Osteopathic Management of Chronic Fatigue Syndrome, Fibromyalgia and Multiple Sclerosis

Course Description
A growing number of people are diagnosed with chronic fatigue syndrome, fibromyalgia and other chronic pain conditions. These patients need effective, noninvasive treatment that doesn’t aggravate their conditions. This course will provide participants the tools to recognize these conditions and to effectively treat these patients.

The assessment and treatment will be done over six specific key lesions (three in the front of the body and three in the back). The treatment will be a blend of Dr. Chikly’s lymph and brain techniques.

The lymph techniques will include lymph mapping and some specific viscera work using a lympho-fascia release approach to viscera such as the liver, pancreas, heart, etc. The brain techniques will include intracranial membranes using curved biotensegrity, brainstem, etc. Specific sacrum techniques will also be presented.

By the end of the course, participants will be able to identify several chronic pain conditions; describe the comorbidity, known causes, and differential diagnoses of these conditions; and explain the importance of the lymphatic system in addressing these conditions.
