Laura E. Griffin, DO, FAAO, Assumes Presidency

Laura E. Griffin, DO, FAAO, of Pikeville, Kentucky, assumed the office of president of the American Academy of Osteopathy on March 19 during the AAO Convocation in Orlando, Florida. She will serve a one-year term.

In her presidential address, Dr. Griffin announced she would focus on service in her year as president of the Academy. “Every person in this room is here because they wanted to serve. … I believe service is part of our nature and part of who we are,” Dr. Griffin said.

Dr. Griffin went on to explain how she believes that service is at the core of the Academy, and as such it is one of the organization’s strengths. She hopes to devote more resources to the Academy’s younger members, citing her own formative experiences at Convocation over the last 25 years.

Dr. Griffin recognized the importance of encouraging younger members of the profession, saying “The more we dedicate to our students and residents, the more we show them how much they mean to us and how much they mean to the future of our profession, the more likely they will be to stay as part of our family.”

Dr. Griffin hopes that through providing service to others, the Academy can make its vision statement a reality: “All patients are aware of and have access to osteopathic medical care and osteopathic manipulative medicine for optimal health.”

A 1996 graduate of the University of New England College of Osteopathic Medicine (UNECOM) in Biddeford, Maine, Dr. Griffin was the first physician to complete UNECOM’s integrated residency in neu-

AAO Member News—ISSN 2375-5628

Dr. Griffin (continued from Page 1)

romusculoskeletal medicine and family practice (NMM-FP). She is board certified in both specialties.

From 2001 to 2008, Dr. Griffin co-directed the NMM-FP residency at Metro Health Hospital in Grand Rapids, Michigan. She currently co-directs the NMM-FP residency at the Pikeville Medical Center in Kentucky. In addition to running UP-KYCOM’s Department of Osteopathic Principles and Practice (OPP), she is an associate professor of OPP at UP-KYCOM, and she is the faculty adviser to the college’s chapter of the Student American Academy of Osteopathy.

Dr. Griffin has served on the AAO Board of Trustees since 2009, and she served on the AAO’s Postdoctoral Standards and Evaluation Committee from 2009 to 2015. The PSE committee helped establish standards and review on-site inspections for the nation’s OMM-NMM residencies. She also has served on the governing board of the American Osteopathic Board of Neuromusculoskeletal Medicine.

Dr. Griffin is one of barely 80 osteopathic physicians who are AAO fellows. The AAO is one of the few specialty colleges that have earned fellowships. To earn her fellowship, Dr. Griffin had to write a thesis and 10 case reports, all of which were reviewed and approved by the Committee on Fellowship in the American Academy of Osteopathy. Dr. Griffin’s thesis, titled “The Effect of Osteopathic Manipulative Treatment During the Neonatal Period on Infant Development and Illness,” examined the effect of osteopathic manipulative treatment performed in the neonatal period on infants’ abilities to breastfeed, rates of growth and development and on the incidence of common illnesses in the first six months of life.

As the Academy’s 2015-16 president-elect, Dr. Griffin led the team that drafted a position paper proposing eligibility requirements for anyone entering residencies with osteopathic recognition. The position paper was adopted by the AAO Board of Trustees in July.

Dr. Griffin concluded her presidential address with a slideshow of photos she had solicited from Academy members demonstrating their service. You can download the slideshow or watch her full presentation online.

President’s Address
The text of the president’s address, delivered at the president’s banquet on March 19, has been edited for publication.

Every person in this room is here because they wanted to serve. Most of you are physicians or physicians-in-training, but some of you are serving by supporting your favorite physician, either at home or in their careers. I believe service is part of our nature, part of who we are. Of course there are people who lose sight of their better angels, but it is hoped that somewhere or someday, there will be a reminder that there is a better way.

I want to focus on the concept of service because I believe it is where the Academy is at its strongest and they say you should maximize your strengths. This last year, Dr. Newman and the Academy leadership and staff navigated rough waters while devoting their time to maintaining the service we provide our members. If you haven’t done so, I encourage you to read her report that details of the Academy’s accomplishments under her dedicated and tireless leadership.

I want to devote more of our time and resources to the service of our younger members. This is my 25th Convocation, and I hope I never miss one throughout my career. Back in the day, everyone attending Convocation got a ticket to this banquet as part of their registration, and some of my fondest memories were of the inspirational speeches and the honoring of the greats in our profession. If there had been any doubt, these would have solidified my desire to make this my life’s work. I want our stu-

(continued on Page 3)
Michael P. Rowane, DO, MS, FAAO, FAAFP, of Richmond Heights, Ohio, was chosen to be the president-elect of the American Academy of Osteopathy on March 17 during the Academy’s annual Convocation in Orlando, Florida. After spending a year as president-elect, Dr. Rowane will become the 2017-18 president of the AAO.

“The world is changing …. We’re at a crossroads, and with the single accreditation system, we have a huge opportunity for the profession and for the Academy,” said Dr. Rowane, who is the director of medical education at University Hospitals Regional Hospitals in northern Ohio and an associate clinical professor of family medicine and psychiatry at Case Western Reserve University (CWRU) in Cleveland.

Dr. Rowane’s experience of working with osteopathic and allopathic physicians will benefit the Academy as the profession transitions into the single accreditation system. “I will do everything I can to keep the Academy at the forefront so we can help lead the change,” said Dr. Rowane.

President’s address
(continued from Page 2)

Students to have that opportunity as much as they can, and I am so grateful to my dean at the University of Pikeville-Kentucky College of Osteopathic Medicine for making it possible for our students to share in this tradition.

I challenge the advisers of the SAAO chapters to get creative in finding ways to get their students to Convocation and—for those who wish it—to the banquet, so they too can be immersed in our rich history and legacy.

I also want to bring more recognition to our residencies going forward. It wasn’t so long ago that there were leaders in the AOA who were unaware that we had training programs in the specialty of NMM. After discussions with Steve Downey at the American Osteopathic Foundation (AOF), I plan to try to find a way to bring our resident of the year to AOF’s big event at OMED. The more we demonstrate our dedication to our students and residents, the more likely they will be to stay within our family once they earn their DO degree.

The vision of the Academy is that “all patients are aware of and have access to osteopathic medical care and osteopathic manipulative medicine for optimal health.” We are on the verge of having the greatest opportunity in our lifetimes to realize this vision. The Academy is planning to collaborate with ACOFP and other organizations to create the education needed for MDs to be able to deliver osteopathic care to more patients than ever before, which serves not only the Academy’s vision but, I believe, A.T. Still’s as well.

How can you, in turn, serve the Academy? Share what you enjoy with colleagues who are not members. Convince them to join and attend our courses. Share your time and join committees to help with the ever-growing work the Academy is undertaking. Share your blessings and consider donating to the Golden Ram Society which has suffered a great loss in its funding and is a vital buffer the Academy relies on to provide you with all the services you receive.

Dr. Rowane is a 1989 graduate of the Des Moines University College of Osteopathic Medicine in Iowa, where he completed a predoctoral fellowship in osteopathic manipulative medicine (OMM). After his residency in family medicine, Dr. Rowane participated in faculty development fellowships at CWRU and at the University of North Carolina at Chapel Hill. He completed a postdoctoral master’s degree in family medicine at CWRU and a fellowship with the National Institute for Program Directors. He co-directs a national osteopathic faculty development initiative, Training the Osteopathic Professions Core Educators (TOPCE) with AACOM. Dr. Rowane was appointed to the Osteopathic Principles Committee of the Accreditation Council for Graduate Medical Education and represents all osteopathic training programs for the Electronic Residency Application Service of the Association of American Medical Colleges.

In 2003, Dr. Rowane became a Fellow of the AAO. The AAO is one of the few specialty colleges that have earned fellowships, and Dr. Rowane is one of barely 80 osteopathic physicians to earn it. He also is a Fellow of the American Academy of Family Physicians.

Dr. Rowane has frequently presented both locally and nationally and has published multiple articles and book chapters. In 2012, he published the book Basic Musculoskeletal Manipulation Skills: The 15 Minute Office Encounter with co-author Paul Evans, DO, FAAFP, FACOFP.

### In the DVD **Dissection of the Brain and Spinal Cord (Neuraxis)**

**Bruno J. Chikly, MD, DO (France), and Alaya Chikly, LMT**

In the DVD *Dissection of the Brain and Spinal Cord (Neuraxis)*, Bruno J. Chikly, MD, DO (France), and Alaya Chikly, LMT, present a detailed and explicit evaluation of the specific structures of the central nervous system. They start by helping viewers to orient themselves to a brain model before shifting to a systematic explanation of each dissection cut. Each structure is carefully labeled with English and Latin anatomical terminology. The 14 chapters of this DVD are an amazing introduction to the complex structures and terminology of neuroscience.

Dr. Chikly is a graduate of the medical school at St. Antoine Hospital in Paris. A registered osteopath in France, Dr. Chikly received an honorary DO degree from the European School of Osteopathy in Maidstone, Kent, in the United Kingdom and a doctoral degree in osteopathy from the Royal University Libre of Brussels in Belgium.

Alaya Chikly, LMT, is the developer of Heart Centered Therapy, an approach that addresses the emotional component of disease.

Seeking Doctor(s) of Osteopathy

Osteopathic Integrative Medicine, a fast growing, comprehensive DO office in Colorado is recruiting skilled DO(s) to join our clinic in Denver.

Practice Benefits include:

- Full scope outpatient specialist practice evaluating and treating newborns, adolescents, adults and geriatrics
- Minimum of 32 scheduled patient care with varying schedule based on needs of practice and providers
- Ability to incorporate procedures into practice with future plans to include Ultrasound guided injections, PRP, Stem cell injections and IV nutrition
- Highly efficient practice
- Great team in a small intimate office setting
- Diverse patient population
- Each DO brings his/her own unique talents

2016 Convocation Draws Record Attendees

More than 1,400 people descended on Rosen Shingle Creek in Orlando, Florida, for the AAO’s 2016 Convocation March 16-20. Titled “Somatic Dysfunction and Emotional Well-being: An Osteopathic Approach to Mental Health,” the event’s lectures and breakout sessions focused on exploring the connections between patients’ psychological and physiological health.

Although the Convocation officially started on Wednesday evening with the opening reception followed by Evening With the FAAOs and Evening With the Stars, Frank H. Willard, PhD, kicked off the lecture sessions for physicians on Thursday morning with a discussion about fascia and headache. Popular breakout sessions for the 673 registered health care professionals included those led by Teodor Huzij, DO (mood disorders); Maud H. Nerman, DO (restoring fluid flow); David C. Mason, DO, FACOFP (treating primary care patients); David L. Corwin, MD (Adverse Childhood Experiences Study); Jane E. Carreiro, DO (treating children); Dana Christopher Anglund, DO (sleep disorders); and Stacey L. Pierce-Talsma, DO, MS, FNAOME, and Carrie R. Janiski, DO, MS, ATC, NASM-PES (exercise and movement).

Running concurrently to the program for physicians was the program for osteopathic medical students. With 637 registrants, the SAAO’s Convocation provides the opportunity for students to meet and learn from some of the most respected leaders in the field and to develop relationships with mentors.

Popular breakout sessions for the SAAO’s program included those led by Sajid A. Surve, DO (acupressure); Jane E. Carreiro, DO (treating children); Richard G. Schuster, DO (active patients); Michael L. Kuchera, DO, FAAO (celiac and midline structures); James W. Binkerd, DO (OMT for extremities); and Daniel G. Williams, DO (visceral manipulation).

Be sure to complete the online surveys about Convocation before April 30. All registered attendees should complete the overall Convocation survey. Physician attendees should complete the survey about the program for physicians, and student attendees should complete the survey about the SAAO program.

Presentations will be posted online as they are made available by the lecturers and breakout session facilitators. You can still order audio recordings of the lectures from Convocation. Download the order form now.

Mark your calendars for March 22-26 and plan to join us for the 2017 Convocation at the Broadmoor in Colorado Springs, Colorado.

Mentors and Protégés Connect at Convocation

Through the work of the Membership Committee, the Mentorship Program at Convocation was overhauled this year into the “Mentor, Mentee, Matching” Program, or M3. Students and physicians were randomly matched during Evening With the Stars and during Evening With the Stars and Stripes programs, and then they were given the opportunity to interact with one another on their own or with the help of a structured scavenger hunt of tasks to complete together. Although there was some initial confusion—as would be expected with any new program—once paired together, both the physicians and students in attendance were thrilled to share in their experiences and camaraderie. “Mentorship is such an important part of our careers as osteopathic physicians,” said 2016 Convocation Program Chair Millicent King Channell, DO, FAAO. “All of us have had mentors that have changed our lives. We owe it to the profession to continue that tradition.”

Stefan Hagopian, DO, FAAO, participated in the M3 program and agreed with Dr. Channell, saying, “Mentorship is important, but it doesn’t come easily for everybody. Having the list of tasks for physicians and students to work on together helped break down some of those barriers and let them truly get to know one another. My mentee and I were able to connect and establish a relationship that will continue even after Convocation ends.”

Not only did the physicians enjoy the overhauled program, but students did as well. Jacob Ryan Gallagher, OMS II, of the New York Institute of Technology College
Mentorship (continued from Page 6)

of Osteopathic Medicine in Old Westbury, said, “The [M] Program was a great experience! My mentor was extremely friendly and very enthusiastic about reaching out and discussing a number of things with me. We not only talked about her career path and our shared interests in medicine, but we also had a chance to connect on our personal experiences that have shaped who we are. Overall, this was definitely a positive experience that I would look forward to participating in as a mentee and mentor in the future.”

The M3 program was a great success, and the Membership Committee is already looking into ways to strengthen and expand the program for next year’s Convocation in Colorado Springs. Until then, happy mentoring!

Record Your Memories for Osteopathic History Project

The New England Osteopathic Heritage Center (NEOHC) is starting a new oral history project, and they need your help.

NEOHC will interview osteopathic physicians of various ages and experiences to capture their stories. Potential interviewees sometimes say they don’t feel interesting enough, but all experiences and values are important to fully document the profession.

Oral histories record the experiences and viewpoints of individuals in their own words so that historians and archivists are able to preserve a more varied, more personal and more complex documentary record of groups who, for many reasons, may not be documenting themselves.

If you or anyone you know is interested in participating in NEOHC’s project, contact archivist Zachary Enright at zenright@une.edu or at (207) 602-2131.

This is the first in a series of courses that the American Academy of Osteopathy (AAO) will be conducting to help MD students and graduates obtain the prerequisites for entering osteopathic-recognized residencies accredited by the Accreditation Council for Graduate Medical Education (ACGME). This course will also be valuable for DO and MD faculty in these residency programs.

In addition, osteopathic physicians who do not use osteopathic manipulative treatment (OMT) daily will find this course useful, as will other health care professionals with limited or no experience with manipulative techniques.

Through a combination of lectures and hands-on workshops, attendees will learn the basics of osteopathic manipulative medicine, which encompasses osteopathic tenets, palpatory diagnosis and OMT.

The curriculum includes lessons on muscle energy technique; thoracic spine technique; articulatory techniques; functional techniques; myofascial release; and high-velocity, low-amplitude thrust.

This course, which is supported in part by the AAO’s Samuel V. Robuck Fund, will provide content applicable to both adult and pediatric patients.

**Course Times**

Thursday from noon to 6 p.m.
Friday, Saturday and Sunday from 8 a.m. to 5:30 p.m.

**Continuing Medical Education**

28 credits of NMM- and FP-specific AOA Category 1-A CME anticipated.

**Meal Information**

Lunch will be provided Thursday through Saturday. Breakfast will be provided Friday through Sunday. Please contact the Academy with special dietary needs at (317) 879-1881, ext. 220, or EventPlanner@academyofosteopathy.org.

**Course Location**

University of North Texas Health Science Center
Texas College of Osteopathic Medicine
3500 Camp Bowie Blvd., Fort Worth, TX 76107

**Course Director**

Lisa Ann DeStefano, DO, has chaired the Department of Osteopathic Manipulative Medicine at the Michigan State University College of Osteopathic Medicine (MSUCOM) in East Lansing since 2004. A protégé of the late Philip E. Greenman, DO, FAAODist, Dr. DeStefano edited the fourth edition of the textbook *Greenman’s Principles of Manual Medicine*.

A 1993 graduate of MSUCOM, Dr. DeStefano is board certified in osteopathic manipulative medicine and neuromusculoskeletal medicine and in osteopathic family medicine. In 2003, she received the Osteopathic Faculty Award and the Guiding Principles Award from MSUCOM. She has lectured widely in the United States and internationally.

Course Description
Edward G. Stiles, DO, FAAO, and Charles A. Beck, DO, FAAO, will present research data that support using a functional approach to treat patients for gait dysfunctions.

During the past few decades, gait concepts have evolved from using a leg-propelling model to using the trunk-driving model that Serge Gracovetsky, PhD, outlined in his book The Spinal Engine. Dr. Stiles suggests that combining these two models with the floating compression pelvic model and the Mitchell axes model will provide a comprehensive understanding of gait mechanics. With traditional approaches to osteopathic manipulative treatment, sacral- and innominate-related gait dysfunctions can persist. By employing the clinical approach presented in this course, physicians can be confident that their patients are walking toward health.

Course Location
Pyramid Three (two buildings away from the AAO’s office) 3500 DePauw Blvd., lower level, Conference Rooms A and B Indianapolis, IN 46268 (317) 879-1881, ext. 220

Course Directors
A 1965 graduate of what is now the A.T. Still University–Kirksville College of Osteopathic Medicine in Missouri, Edward G. Stiles, DO, FAAO, has a rich and deep understanding of numerous pioneering concepts, events and personalities in osteopathic medicine.

While an osteopathic medical student, Dr. Stiles trained with George Andrew Laughlin, DO, a grandson of Andrew Taylor Still, MD, DO. Early in his medical career, Dr. Stiles took over the Cambridge, Massachusetts, practice of Perrin T. Wilson, DO, an internationally recognized osteopathic physician and the second person to lead the American Academy of Osteopathy. Dr. Stiles established the first hospital-based osteopathic manipulative treatment (OMT) service in the United States, and he helped develop the first OMT billing codes. Additionally, he has been recognized by the American Osteopathic Association as a Great Pioneer in Osteopathic Medicine.

Dr. Stiles has taught at the osteopathic medical colleges at Oklahoma State University, Michigan State University and the University of Pikeville in Kentucky. He has delivered the American Osteopathic Association’s Andrew Taylor Still Memorial Address, as well as the Academy’s Thomas L. Northup Lecture, its Scott Memorial Lecture and its Harold A. Blood, DO, FAAO, Memorial Lecture. Dr. Stiles also is a recipient of the Academy's highest award, the Andrew Taylor Still Medallion of Honor.

Like Dr. Stiles, Charles A. Beck, DO, FAAO, is board certified in neuromusculoskeletal medicine. He earned his DO degree from the University of Pikeville-Kentucky College of Osteopathic Medicine (UP-KYCOM).

Dr. Beck has received many awards, including the Edward G. Stiles Award for Osteopathic Manipulation from UP-KYCOM, and he serves as an adjunct faculty member for several osteopathic medical schools, including the Lake Erie College of Osteopathic Medicine and the Marian University College of Osteopathic Medicine. Dr. Beck is in private practice in Indianapolis at the Meridian Holistic Center.

* The AAO’s associate members, international affiliates and supporter members are entitled to register at the same fees as full members.

The AAO accepts check, Visa, MasterCard and Discover payments in U.S. dollars. The AAO does not accept American Express.
Membership Announcements

2016-17 Dues Notices
Dues notices for the 2016-17 year will be mailed at the end of May. Please pay your dues promptly by mailing your payment to the Academy or by logging in to your account at www.academyofosteopathy.org to pay securely online.

Graduating Students
Your membership in the Student American Academy of Osteopathy expires when you graduate. To stay connected with your colleagues in the Academy and to learn about AAO opportunities, join the Postgraduate American Academy of Osteopathy before Aug. 1. A four-year resident’s membership costs only $146. That’s less than $40 per year. Return the PAAO membership application with your payment to AAO Membership Liaison Susan Lightle at SLightle@academyofosteopathy.org or at 3500 DePauw Blvd., Suite 1100, Indianapolis, IN 46268-1136.

Drew D. Lewis, DO, FAOCPMR, FAAPM&R, of Des Moines, Iowa, was named a fellow of the American Osteopathic College of Physical Medicine and Rehabilitation. This award recognizes Dr. Lewis’s leadership in research, education, teaching and administrative work to advance osteopathic physiatry. Dr. Lewis serves on the Academy’s Awards Committee and on the Student Academies Committee.

On May 21, Tyler C. Cymet, DO, will deliver the commencement address at the William Carey University College of Osteopathy Medicine. Dr. Cymet is the chief of clinical education for the American Association of Colleges of Osteopathic Medicine, and he is a past president of DOCARE International.

Members in the news  
(continued from Page 10)

Helen Suzanne Hill, OMS IV, of Flagstaff, Arizona, and Victoria Nicole Lomas, OMS II, of Christiansburg, Virginia, were two of the students featured in the American Osteopathic Foundation’s (AOF) 2015 Human Touch video. During the AOF’s annual Human Touch Student Leadership Project, osteopathic medical students have opportunities to profoundly affect patients’ lives outside the clinic.

SAAO members Jessica Koren OMS II, and Gabrielle Jasmin, OMS II, participated in a recent health fair at the Touro College of Osteopathic Medicine in Harlem. TouroCOM’s biannual health fairs offer preventive screenings, education and referrals to primary care physicians at a nearby clinic. Koren was a co-organizer of the event. Read The DO’s Feb. 25 article about the event.

In February, SAAO member Timothy Joseph Nobles, OMS II, from the Nova Southeastern University College of Osteopathic Medicine in Fort Lauderdale, Florida, received a $500 AFOMA Believes In You Scholarship Award from the Advocates of the Florida Osteopathic Medical Association (AFOMA). The award is partly based on a student’s interest in osteopathic medicine, activities in the profession, and leadership abilities. Nobles received his award during the 113th Annual Florida Osteopathic Medical Association (FOMA) Convention held February 18–22 at the Bonaventure Resort and Spa in Weston.

At the same banquet, Hemali Patel, OMS II, received a $500 FOMA Student Award from the Florida Osteopathic Medical Association, which is presented to a deserving student based on criteria such as possessing leadership skills, supporting FOMA student district society initiatives, and showcasing significant interest in the osteopathic profession and osteopathic manipulative medicine.

Amy Elizabeth Owen, OMS I, who volunteers with the Homeless Outreach Through Medical Education Clinic at the University of North Texas Health Science Center Texas College of Osteopathic Medicine in Fort Worth, was interviewed for a March 9 article in Fort Worth’s Star-Telegram about efforts to provide medical care to the city’s homeless population.

On Nov. 13, 2015, a team of third- and fourth-year students from the Midwestern University/Arizona College of Osteopathic Medicine in Glendale won their division in the Doctor’s Dilemma competition at a meeting of the American College of Physicians Arizona Chapter in Tucson. The Doctor’s Dilemma is a Jeopardy-style event where teams are asked questions about little-known diseases, diagnostic techniques and medical history. The winning team included SAAO members Michael H. Schild, OMS IV, and Brittany Karlovich, OMS III.

Evelyn Ann Schwalenberg, DO, MS, FACP, FACOI, of Glendale, Arizona, was elected as a member-at-large of the Commission on Osteopathic College Accreditation (COCA) of the American Osteopathic Association. Dr. Schwalenberg is the associate dean of clinical education at the Midwestern University/Arizona College of Osteopathic Medicine in Glendale.

The GE-National Medical Fellowship Primary Care Leadership Program provides medical students with a valuable opportunity to examine primary care firsthand in medically underserved communities across the United States. The following SAAO members from the Midwestern University/Arizona College of Osteopathic Medicine in Glendale were selected for the program: Timothy Wayne Ellis, OMS II; Gina

(continued on Page 12)
Robinson, OMS III; and Herman N. Lee, OMS II.

The 35th annual fall seminar of the Arizona Osteopathic Medical Association (AOMA), which was held in Tucson in November, posted a record attendance with more than 220 registrants. The AOMA Professional Education Committee is chaired by Lori Alane Kemper, DO, MS, FACOFP. Katherine A. Worden, DO, MS, was one of the speakers, and Stuart J. Friedman, DO, mentored the students who moderated the lectures. Student moderators included SAAO members Samantha Anne Easterly, OMS II, Cailey Madelaine Indech, OMS I, Sofia Mani, OMS II, and Starr Caitlin Matsushita, OMS II.

Jessica Marie Gustavson, DO, of Des Moines, Iowa, who spent most of her family medicine rotation with Noreen O'Shea, DO, FAAFP, praised the senior physician in a Winter 2016 issue of DMU Magazine, saying, “Dr. O’Shea is a brilliant physician, yet she continues to learn from her patients.”

Committee Seeks Nominations for Resident Member

The Osteopathic Neuromusculoskeletal Medicine (ONMM) Review Committee is seeking prospective candidates for a resident member position that will become available July 1, 2016. The resident member must either currently be in an AOA-approved neuromusculoskeletal medicine program or must plan to be enrolled in an AOA-approved neuromusculoskeletal medicine program or an ACGME-accredited ONMM program on July 1, 2016. He/she may not serve more than one year after completing an ONMM residency program.

After review and consideration of all nominations, the Review Committee will forward its selection to the ACGME Board of Directors. The new member’s term will begin July 1, 2016 and end June 30, 2018.

Additional information, along with the nomination form, are available upon request from ACGME Executive Director Tiffany Moss at tmoss@acgme.org. Nominations will be accepted until April 18, 2016.

Funding Available for Osteopathic Philosophy Research

AOA has identified five research priorities it believes have the greatest potential to impact patient care and evidence-based medicine and to demonstrate the value DOs and their approach to care bring to the medical profession. As a result, the AOA has released two Requests for Applications (RFAs) relating to the research focus area of Osteopathic Philosophy. Please see this flyer for more information. Deadline is May 3.

AOA Strategic Team Award and Recognition (STAR) Applications

Each year, the AOA Strategic Planning Committee recognizes those osteopathic organizations that are implementing innovative activities to advance the osteopathic profession. The annual Strategic Team Award and Recognition (STAR) prize is awarded to osteopathic affiliates (states and specialties), OPTIs, colleges of osteopathic medicine, and non-practice affiliates that have implemented meaningful new projects to advance osteopathic medicine. Contest winners receive a STAR plaque and a free registration to the annual CME Sponsors Conference or the OME Leadership Con-
Call for Research Abstracts
The AOA is calling for abstracts for the 2016 Osteopathic Medical Conference and Exposition (OMED) in Anaheim, California. Online submission opened Wednesday, March 15, 2016. Submission deadline is Sunday, May 15, 2016 at 11:59 p.m. Read the Abstract Eligibility and Instructions for more information. If you have questions, please contact Gloria Dillard, MPH, at (800) 621-1773, ext. 8006 or at gdillard@osteopathic.org.

Medicare Part D Prescriber Enrollment Enforcement Delayed
The Centers for Medicare and Medicaid Services (CMS) is delaying enforcement of the Part D Prescriber Enrollment Requirements until Feb. 1, 2017. Despite the delay, physicians who want to prescribe medications covered under Medicare Part D are required to be enrolled in Medicare. CMS said it is delaying enforcement to minimize the potential for disrupting beneficiaries’ access to needed Part D medications. With the revised date, prescribers have additional time to complete their enrollment activities. The AOA has tracked this regulation and raised concerns about the potential access barriers this requirement could cause for Medicare beneficiaries.

CMS encourages prescribers of Part D drugs (except those who meet the definition of “other authorized prescribers”) to submit their Medicare enrollment applications or opt-out affidavits to their Medicare Administrative Contractors (MACs) before Aug. 1, 2016. This should provide the MACs with sufficient time to process the prescribers’ applications or opt out affidavits and prevent prescription drug claims associated with their prescriptions from being rejected by Part D plans beginning Feb. 1, 2017. CMS provides Part D guidance for additional information.

Five Common Mistakes Costing You Money
According to www.askamedicalbiller.com the coding mistakes below can cost your practice thousands of dollars each year. Prevent them in your office by double checking each claim before it leaves your office.

1. Using outdated codes on encounter forms.
2. Using codes that do not indicate medical necessity. Check your NCCI edits to prevent this.
3. Using default codes or always billing the same codes. Note: each patient visit needs to be evaluated and coded appropriately based on the services provided. Undercoding and overcoding are both inappropriate behaviors.
4. Using the wrong modifier. Note: most inappropriately used modifiers are Modifier 24, Modifier 25 and Modifier 59.
5. Inappropriately linking medical codes to services provided.

Visit the AOA Practice Management Tips page to view additional tips to help in the day to day operations of your office.

Power Up Webinar: What’s Your Mission?
A strong mission statement is a great way to brand your practice and let patients and staff know what you’re all about. The patient should know what to expect from your practice, what its values are, and what the practice is doing in the community—and these attributes need to be consistent. If you are unable to commit to a consistent program to fulfill the mission and have it realized by your customers, then there’s a good chance you haven’t developed the right mission. Focus on the key attributes of your business to get you to the reality of the practice’s mission, based on existing services and products, attitudes and behavior demonstrated, the goals the practice sets each year, and how hard the practice works to achieve those goals. Most importantly, remember to keep the mission statement clear and brief. View the on-demand What’s Your Mission? Webinar to learn more about the importance of a strong and well-defined mission statement.

Upcoming Webinars
On April 27, 2016, at 1 p.m. Central, the AOA will present “Stark Law and Other Self-Referral Laws That Physicians Need to Know.” Every physician should know and appreciate the legal, professional, financial and personal hazards of self-referral financial relationships. Violations of Stark Law and related regulatory federal and state laws often result in severe adverse consequences for physicians, even if the violation is unintentional. This webinar will provide a basic explanation for physicians of Stark Law and related self-referral laws as well as the penalties and other adverse consequences for violations.

On May 18, 2016, at noon Central, the AOA will present “Medicare’s Chronic Care Management Program: The Challenges and Opportunities for Medical Practices.” In this webinar, participants can learn about Medicare’s Chronic Care Management Program and the new unique 99490 CPT code, how to take advantage of the recurring revenue and improve quality outcomes for your patients. The webinar will cover the current challenges surrounding the care for patients with chronic diseases, Medicare’s requirements for reimbursement, and how practices can start on their path to value-based care.

Golden Ram Campaign Update

The Academy’s 2015-16 Golden Ram campaign, which started June 1, will close on May 30, 2016. As of March 31, the fund had received $25,995 from 87 contributors. That is 74 percent of the $35,000 goal for 2015-16.

Since 1987, the Golden Ram Society has been the vehicle through which everyone can support the Academy’s mission with an annual contribution. These generous contributions enable the AAO to offer quality educational programs at reasonable rates, develop new programs using new technology, expand the AAO’s public education efforts, and support AAO operations and activities.

Donations to the 2015-16 Golden Ram campaign can be made online by logging on to www.academyofosteopathy.org. Donations also may be mailed to the Golden Ram Society, American Academy of Osteopathy, 3500 DePauw Blvd., Suite 1100, Indianapolis, IN 46268-1136.

You can set up recurring monthly donations of $25 or more. Call AAO Interim Executive Director Sherri L. Quarles at (317) 879-1881, ext. 214, for more information.

President’s Club—$2,500 or more
Damon Matthew Whitfield, DO

A.T. Still Club—$1,000 to $2,499

Lifetime Donors Recognized
During the Academy’s annual meeting in Orlando, Florida, on March 17, donors who had made significant lifetime contributions to the Golden Ram Society were recognized.

Walter C. Ehrenfeuchter, DO, FAAO; Richard C. MacDonald, DO; and Akiyoshi Shimomura, DO (Hon.) (Japan) received ruby pins for lifetime donations exceeding $5,000.

The Academy is sincerely grateful to Dr. Ehrenfeuchter, Dr. MacDonald and Mr. Shimomura for their generosity.
Fulford’s Basic Percussion Hammer
April 29–May 1, 2016 • University of North Texas Health Science Center
Texas College of Osteopathic Medicine in Fort Worth

Course Description
Based on the work of the late Robert C. Fulford, DO, this course introduces Dr. Fulford’s concepts of vibration, love and breath as they relate to osteopathic philosophy and practice.

Strongly influenced by Andrew Taylor Still, MD, DO, and William Garner Sutherland, DO, Dr. Fulford emphasized how the energy of the body affects the physiology of the body. He was a proponent of the percussion hammer, which sends oscillating energy waves through the body to encourage healing.

Attendees will learn about Dr. Fulford’s life and practice, and they will come to understand how life energy, fascia and piezoelectricity affect anatomy.

By the end of the course, attendees will be able to evaluate their patients, diagnose dysfunctions and apply vibratory treatment following Dr. Fulford’s teachings on the percussion hammer.

Prerequisite
Attendees must have completed a 40-credit introductory cranial course approved by The Osteopathic Cranial Academy or undergone equivalent training as determined acceptable by the course director.

Course Times
Friday and Saturday from 8 a.m. to 6 p.m.
Sunday from 9 a.m. to 3 p.m.

Meal Information
Breakfast and lunch will be provided each day. Please contact the Academy with special dietary needs at (317) 879-1881, ext. 220, or EventPlanner@academyofosteopathy.org.

Continuing Medical Education
22 credits of NMM- and FP-specific AOA Category 1-A CME anticipated.

Course Location
University of North Texas Health Science Center
Texas College of Osteopathic Medicine
3500 Camp Bowie Blvd.
Fort Worth, TX 76107
