Message from the President

We live in a fast-moving world, and the House of Medicine is no exception. Medical training is multi-modal now, with greater use of interactive software, multimedia and applications for smart phones. There are systems that put pressure on us every day. The payment system is increasingly complex. We all struggle at various times to keep up.

The AAO is no stranger to all these things. Our physicians are affected on a daily basis, and that has shaped our focus in recent months. We have entered a new phase where we are working from a Planning Playbook to guide our decision-making instead of a strategic plan. The Planning Playbook is meant to be more dynamic, more nimble, rather than a fixed set of objectives that are often outdated six months into their use.

We collaborated with the American Osteopathic Association to keep our members abreast of recent explorations at the Centers for Medicare and Medicaid Services regarding payment. We asked you to respond and you did! Many of you went to the website and provided commentary on the proposed changes and quickly! We thank you. We want your voice to be heard.

We are continuing to explore collaborations to be able to offer osteopathic education in a variety of formats. There are some exciting opportunities in the works! Stay tuned. Meanwhile, our executive director continues to be active in two different associations working to collaborate with other groups to provide osteopathic education in a variety of formats.

The staff has been working hard to prepare for the AAO’s program at OMED, Oct. 6-8 in San Diego. In addition to the didactic sessions, we will be offering our Osteopathic Education Service in the exhibit hall (booth 106), and we’ll be staffing an exhibit booth (booth 209). Stop by and check us out.

I am increasingly concerned about physician burnout and how it is impacting our physicians. Day after day, treating patients, I see them visibly relax on the table. How can we take better care of our own, recharging our own batteries to be better equipped to help our patients? I am excited that more organizations are interested in collaborating with us to offer OES at their events. Please, if you have a setting where this service would be an enhancement, reach out to us!

AAO Member News—ISSN 2375-5628

---

Join the AAO at OMED, Oct. 6-8 in San Diego

If you’re attending OMED in San Diego this month, please stop by the AAO’s program, where we’ll be presenting “Respectful and Mindful Use of Our Hands Across the Osteopathic Disciplines” Oct. 6-8 at the San Diego Convention Center. Led by program chair Robert N. Agnello, DO, FACOFP, the AAO’s program will present various viewpoints on incorporating osteopathic principles into the practice of different specialties. The AAO is partnering with several specialty colleges to provide lectures and hands-on instruction from specialists with clinical experience in internal medicine, neurology, psychiatry, obstetrics and gynecology, pediatrics, family medicine and sports medicine.

See the complete schedule and download presentations at www.academyofosteopathy.org/OMED. The AAO anticipates 22.5 credits of AOA Category 1-A continuing medical education for its program.

Osteopathic Education Service

The AAO will host its Osteopathic Education Service in the exhibit hall at OMED as we have done for many years. OES offers personalized, hands-on demonstrations of osteopathic diagnostic and treatment techniques in both private and group sessions. DOs from all specialties are invited to volunteer to demonstrate their palpatory and treatment skills at the OES. Volunteers receive 0.5 credit of AOA Category 1-B CME for each demonstration.

Volunteers must have their own professional liability coverage. Demonstrations are for educational purposes only. Anyone using the OES facilities will be required to complete OES paperwork.

For additional information, contact Bev Searcy, the AAO’s finance and membership liaison, at (317) 879-1881, ext. 212, or at BSearcy@academyofosteopathy.org.

Exhibit Booth

As you explore the OMED Experience Zone, do stop by and introduce yourself to the AAO staff and student volunteers at the AAO’s exhibit booth. We love to put faces to names and voices! While you’re at the exhibit booth, pick up a copy of the AAO’s 2019 Convocation brochure.

Registering for OMED

When you register for OMED, be sure to identify the AAO as one of the specialty colleges whose programs you will attend. Doing so will allow AOA to allocate funds to offset the AAO’s costs. While you may specify up to four specialty colleges on your registration, doing so reduces the percentage each receives, so it is best to only specify those whose programs you will attend. If you did not specify the AAO when you registered, you can adjust your registration when you check in at OMED.

AAO will partner with multiple specialty colleges for OMED 2018 in San Diego.
Registration is open for the AAO’s 2019 Convocation at Rosen Shingle Creek in Orlando, Florida. Program chair Rebecca E. Giusti, DO, has recruited speakers who will present cutting-edge research, a way of reimagining osteopathic principles and practice with dynamic imaging and the innovative ways that students are learning. Breakout sessions will provide an opportunity to learn new techniques and protocols for managing common medical conditions in a variety of environments. Overall, we hope that participants will leave invigorated with a sense of where the profession is heading and how they are a key part of this dynamic and evolving field.

New Features
Wake up with beginner yoga, a gentle, flowing class focused on breath and alignment on Thursday, Friday and Saturday. Attendees are encouraged to bring mats or towels to use for floor postures. Registration is not required.

The inaugural Resident Lecture Track will present a series of mini-lectures on Saturday for and by resident members of the AAO. This year’s lectures will focus on professional development and may include topics such as billing for osteopathic manipulative treatment, malpractice, faculty development and financial planning. Seating is limited, so sign up now.

Returning Highlights
The 2019 theme of Wednesday’s Evening With the FAAOs is “‘Elementary, my Dear Watson’—Finding ‘Osteopathic Edges’ in Patient Care.” Moderator David B. Fuller, DO, FAAO, has recruited four Fellows of the AAO who will share their perspectives on how to find an osteopathic “edge” to hold onto with different patient presentations. They will give examples of using observation and reasoning, much as Sherlock Holmes did, applied to the context of problem-solving with osteopathic manipulative medicine. All registered attendees are invited to attend this event.

Perennial favorites Evening With the Stars on Wednesday and Evening With the Stars and Stripes on Thursday offer unstructured time to teach, learn and practice osteopathic manipulative treatment techniques with your peers. Experienced clinicians who do not often have the opportunity to share their unique perspectives can interact with students from around the country. Students have the opportunity to meet and learn from clinicians they otherwise may not have access to.

Learn more about the LBORC’s research forum on Page 7. Additional events, such as the SAAO’s Fun Run, the New Ideas Forum and poster presentations, will be highlighted in future issues of AAO Member News. Download the full Convocation brochure to learn more now.

Annual Business Meeting Luncheon
AAO members in good standing are invited to attend the AAO’s annual business meeting and luncheon on Thursday, March 14, from 11:45 a.m. to 2:15 p.m. At the meeting, members will receive annual reports from the president, president-elect, secretary-treasurer and executive director, and members with voting privileges will have the opportunity to elect new leaders. In addition, 2018-19 AAO President Catherine M. Kimball, DO, will present the Academy Award, which recognizes individuals outside of the Academy who have profoundly contributed to the profession.

To cast your vote for the Academy’s leaders, bring a cell phone, tablet or other mobile device with texting capabilities.
NMM PLUS 1
RESIDENCY PROGRAM IN SOUTHAMPTON, NY

NMM Plus 1 Residency at Southampton Hospital in beautiful Southampton, Long Island. Applications are currently being accepted. If interested, please contact Program Director Lawrence Barnard, DO, lbarnard@southamptonhospital.org; Program Coordinator for NMM+1 program Stefania Salzman (631) 726-0409, ext. 126; or Education Department Secretary Karen Roberts at (631) 726-0409.

NMM/OMM +1 POSITIONS AVAILABLE IN CORVALLIS, OR

Good Samaritan Regional Medical Center, an active hospital, labor, pediatric and outpatient service, has NMM/OMM +1 residency positions open for the 2018-19 academic year. Continuity clinics with Oregon State University athletes as well as a weekly free pediatric clinic. Applicants must have finished any type of AOA-approved residency by June 2018. Contact Elizabeth Caron, DO, at ecaron@samhealth.org, or call the Graduate Medical Education Department at (541) 768-4906.
Exhibit at the 2019 Convocation

Exhibiting at the AAO’s annual Convocation gives you access to more than 1,200 osteopathic physicians and students with interests in manual medicine as well as conventional and alternative treatment approaches. Attendees enjoy learning about medical innovations, practical products and services, and new opportunities.

Coffee and tea will be provided in the exhibit hall each morning, and limited lunch options will be available to purchase each day (cash only), encouraging even more traffic throughout the exhibit hall.

Share the exhibitor prospectus with your colleagues or vendors, or contact AAO Event Planner Gennie Watts for more information at 317-879-1881, ext. 220, or at GWatts@academyofostepathy.org.

If you are unable to exhibit at Convocation, consider the sponsorship opportunities available on Page 4-5 of the exhibitor prospectus, providing ample means of extending your organization’s influence.

South Georgia Campus – Philadelphia College of Osteopathic Medicine, located in Moultrie, is seeking qualified individuals for a full time Site Director position in the Department of Osteopathic Manipulative Medicine (OMM).

Osteopathic Manipulative Medicine Site Director

This individual will be expected to teach osteopathic medical students in both lecture and laboratory sessions in all four years of the curriculum, assist in the preparation of OMM video clips and tutorials, and assist in the planning and production of new publications.

The successful applicant will have a D.O. degree or Board certification in Osteopathic Neuromusculoskeletal Medicine and Osteopathic Manipulative Medicine. The candidate needs to have experience in teaching Osteopathic manipulative medicine in lecture, lab and small group settings. Also must be license or be eligible for a license to practice Osteopathic Medicine in the State of Georgia. The review of applications will begin immediately and continue until the position is filled. Salary for this position will be commensurate with experience and qualifications.

To apply for the position, send via E-mail a personal statement describing interest in and qualifications for this position, a curriculum vitae, and names and addresses of three references, preferably from current or former supervisors to hr@pcom.edu.

Are you looking to move in the direction of rural health? If so, then we have several open faculty positions for you:

For more than a century, Philadelphia College of Osteopathic Medicine has provided high-quality, hands-on training in osteopathic medicine. As the field of medicine has changed, we’ve changed with it—adapting our program offerings to better meet the needs of healthcare providers and the communities they serve.

Now, with our new location in South Georgia, we look forward to providing the same educational excellence that has made PCOM a national leader in osteopathic medical training and a respected force in our other professional and graduate program offerings.

PCOM South Georgia will be located in Moultrie, Georgia—the Colquitt County seat. The city features a beautiful downtown area which is home to a historic courthouse, the Ellen Payne Odom Genealogy Library, numerous specialty shops and more. Colquitt County is known for its thriving agricultural industry, the Colquitt County Arts Center, hunting preserves and natural recreation areas. PCOM South Georgia is expected to open in August of 2019.
Resident of the Year Nominations Due Nov. 30

Established in 2008, the AAO’s Resident of the Year award recognizes outstanding residents who promote osteopathic principles and practices in their residency programs in addition to contributing to the AAO and the osteopathic profession at large. You are encouraged to nominate a resident who has contributed to the AAO, has contributed to osteopathic principles and practices at his/her residency program, and who has participated in Academy events, including but not limited to the AAO’s Convocation, the American Osteopathic Association’s annual conference (OMED), and/or AAO educational programs. Residents also may represent their residency program with a self-nomination for the American Academy of Osteopathy Resident of the Year.

Nomination forms must be accompanied by a brief essay on the nominee’s merit, a personal statement from the nominee and the nominee’s current curriculum vitae. This packet of information must be submitted in one complete application by the nominating organization and must be postmarked by Nov. 30. Nominees must have a residency completion date after Jan. 1, 2018, and residents are invited to nominate themselves. One nomination per year is accepted from any osteopathic-approved residency program or AAO component society.

The award will be presented during the AAO’s 2019 annual meeting on Thursday, March 14, at the Rosen Shingle Creek Resort in Orlando, Florida.

Call for Fellowship Applications: Due Dec. 1

The Committee on Fellowship in the American Academy of Osteopathy is inviting AAO members to apply for the earned designation of Fellow of the American Academy of Osteopathy (FAAO).

Application requirements include the following.

- Membership in the AAO for at least five consecutive years prior to application.
- An active American Osteopathic Association board certification.
- Being in practice for five years after receiving your certification.
- Involved in AAO organizational activities.
- Evidence of providing service to the osteopathic profession (three of six possible categories).
- A completed application with accompanying documentation.
- The proposed abstract, outline and references of your FAAO thesis paper.

The challenging and worthwhile fellowship process involves an application, an initial interview at the AAO Convocation, three drafts of the thesis, three case histories, and a final interview/examination. This process is scheduled over a 22-month period to provide the candidate the opportunity to fully develop four academic articles of publishable quality in making a meaningful contribution to the osteopathic profession.

Applications for the 2019-21 FAAO candidate cycle are due Dec. 1, 2018. Instructions for the fellowship process are in the Committee on Fellowship in the AAO Information for Candidates booklet which is part of the application packet. Find complete information at www.academyofosteopathy.org under Membership > Physicians > Fellowship Program.

Completed applications and questions should be submitted to Board and Committee Liaison Debbie Cole by Dec. 1, 2018 (postmarked Dec. 1).

Jacob J. Cukierski, DO (left), from the Millcreek Community Hospital in Erie, Pennsylvania, was named the AAO’s 2018 Resident of the Year in March. Michael P. Rowane, DO, MS, FAAO, FAAFP, the AAO’s 2017-18 president, presented the award during the AAO’s annual business meeting on March 22 in Dallas.
LBORC Research Forum: Research Proposal and Mentorship Grand Rounds

On Thursday, March 14, 2019, the Louisa Burns Osteopathic Research Committee (LBORC) will host its annual research forum, Research Proposal and Mentorship (RPM) Grand Rounds, from 7 to 8:30 p.m. The purpose of this program is to assist physicians and osteopathic medical students in assessing research proposals and to facilitate the outcome of osteopathic research. Light refreshments will be provided at this event.

The format for this evening is similar to the TV show “Shark Tank” where aspiring investigators at any stage of their career present their research proposal to the audience and a panel of experienced researchers. In doing so, presenters will receive advice on their projects to increase the rigor of their study, and they will have the potential of one of the experts choosing to help mentor the investigator during their study. The audience directly engages both the investigators and the panelists to help audience members gain numerous pearls to refine their own research questions and identify ways to improve osteopathic research projects. Presenters from previous RPM Grand Rounds will provide status updates on their projects at the beginning of this session.

Researchers interested in presenting proposals should submit a written concept paper (two-page maximum) no later than Jan. 31, 2019, to DCole@academyofosteopathy.org. Proposals should clearly define the clinical relevance, research question, and testable hypothesis. They should include an overview of the study design, cohort to be studied, recruitment strategy, methodology, and projected timeline and budget. Learn more at www.academyofosteopathy.org.

Please sign up for the forum when you register for Convocation. All attendees are invited to register regardless of research experience.

You are encouraged to join the members of the LBORC for a very interactive, entertaining session to experience the process of research project development.
Membership Announcements

Get Noticed
Are you and your practice listed on the Academy Find a Physician page? If not, log in to your account at www.academyofosteopathy.org to update your privacy settings.

There are three levels of privacy: private, which means the information is viewable only by you and AAO staff; members only, viewable by all AAO members when they are logged in to the site; and public, viewable by all visitors. You can update these settings by clicking Edit Profile and choosing Privacy.

To ensure your information is included in the physician search, make your basic information public. See the online FAQ for step-by-step guidance.

Membership Directory
Looking to connect with colleagues? The AAO’s online member directory will help. Log in to your account at www.academyofosteopathy.org and click on Profile > Member Directory Search.

New Graduates: Membership Expired
Membership in the Student American Academy of Osteopathy expired upon graduation. To stay connected with your colleagues in the Academy and to learn about AAO opportunities, join the Resident American Academy of Osteopathy. Join online for as little as $44 per year. Save up to $30 when you purchase a multi-year membership.

Update Records
Have you moved? Graduated? Changed jobs? All of the above? Log in to your account at www.academyofosteopathy.org to update your records.

(continued on Page 9)

Committee Corner

We will do our best to keep members updated on committee activities in this recurring section.

See a complete list of committees at www.academyofosteopathy.org. Do not hesitate to contact the committee’s staff liaison or the committee chair with any questions or concerns.

In August, members of the AAO’s Board of Governors submitted votes via email to approve the minutes of the March 2018 meeting and to approve changes to the FAAO applicant and candidate documentation submitted by the Committee on Fellowship in the AAO. See Page 6 for the Call for Fellowship Applications.

The Committee on Fellowship in the AAO met Aug. 22 to review submitted case histories and thesis drafts of candidates in the 2017-19 and 2018-20 FAAO cycles. In the committee members’ review of the documents submitted by the four candidates in the 2017-19 cycle, the case histories and thesis of three candidates were accepted as meeting criteria for proceeding in the Fellowship process. The fourth candidate was asked to submit revised case histories and a thesis draft for the next due date in the 2018-20 candidate cycle. The committee also reviewed the submission of the thesis first draft and case history of one of two candidates in the 2018-20 cycle and requested that the candidates make revisions to those documents. The next due date for the submission of FAAO candidate documents is Dec. 15, 2018. The committee’s next meeting is Oct. 20, 2018, for an all-day in-person meeting held at the AAO office for the oral and practical examinations of five candidates and to conduct committee business.

The Louisa Burns Osteopathic Research Committee met on Aug. 15, to review the status of each of the subcommittees’ work. The Grant Review Subcommittee is in the process of reviewing two grant proposals to fund research projects. The Poster Presentation Subcommittee is getting prepared for the 2019 AAO LBORC-NUFA poster presentations by updating documentation and confirming deadlines for abstract submissions and poster presentations. The Research Training Subcommittee will continue the LBORC research forum, Research Proposals and Membership Grand Rounds, with the same format at last year’s program. The Students in Osteopathic Academic Research (SOAR) Subcommittee is working to develop a national program with contacts at each of the colleges of osteopathic medicine.

The Osteopathic Medical Economics Committee met in early August to develop its consensus statement concerning the proposed 2019 Centers for Medicare and Medicaid Services’ physician payment schedule. The committee continues its work on the assigned tasks of: identifying website resources for members with regard to billing, coding and reimbursement; MACRA in terms of OMM/OMT; data gathering of members’ billing and reimbursement issues; CME programming as it relates to practice management; health policy fellows as a resource for information, and the development of a bureau of experts on practice management as it relates to OMM/OMT.
2018-19 Golden Ram Campaign Underway

The AAO’s 2018-19 Golden Ram campaign launched July 1 with a goal of $20,000. As of Sept. 24, 2018, a total of $8,437.02 has been contributed by 27 donors. That’s just over 42 percent, so we are on our way to another great year!

Established in 1987, the Golden Ram Society is the primary fund that supports the Academy’s mission. Because the Academy cannot operate on dues revenue alone, generous contributions to the Golden Ram Society allow the AAO to offer quality educational programs at reasonable rates, develop new programs using new technology and expand the AAO’s public education efforts.

Donations to the 2018-19 Golden Ram campaign can be made online by logging on to www.academyofosteopathy.org. Donations also may be mailed to the Golden Ram Society, American Academy of Osteopathy, 3500 DePauw Blvd., Suite 1100, Indianapolis, IN 46268-1136.

You can set up recurring monthly donations of $25 or more. Call AAO Executive Director Sherri L. Quarles at (317) 879-1881, ext. 214, for more information.

Spread the Word
When was the last time you invited a colleague to join the AAO? Although the AAO’s mission is grounded in perpetuating the founding principles of osteopathic medicine, a large number of DOs are not members of the Academy. Challenge yourself to invite 12 colleagues in the next year to join our mission. For only $288 per year, DOs enjoy considerable discounts on courses and publications, and they receive complimentary subscriptions to The AAO Journal and AAO Member News. See a complete list of membership benefits at www.academyofosteopathy.org.

The Campbell University School of Osteopathic Medicine (CUSOM) in Buies Creek, North Carolina, unveiled a new 7,000 square foot biomedical research facility in early August. John M. Kauffman Jr., DO, FACOI, FACP, dean of CUSOM, said, “Campbell Medicine aims to expand research collaboration amongst students, faculty, and residents while increasing research productivity with publications, presentations, and extramural funding.” Later the same month, Dr. Kauffman welcomed 164 new medical students, saying “We are delighted to have seated such a robust and highly-credentialed class.”

*(continued on Page 11)*
Member news (continued from Page 10)

Milie Fang, OMS II, from the Marian University College of Osteopathic Medicine (MU-COM) in Indianapolis shared advice for incoming medical students on MU-COM’s website. Fang was used to being very busy even before medical school, but she has learned to “focus on the now and find joy in being in the moment when life seems a bit too overwhelming.”

In a piece published by The DO on Aug. 21, Tebyan Rabbani, OMS IV, describes how suddenly becoming a patient in the hospital where he worked changed his perspective as a physician. He’s determined his role as a physician “is to heal and prevent disease…[and] to be a shield for those at their most vulnerable.”

Rachel Dulan, OMS III, from the Ohio University Heritage College of Osteopathic Medicine is one of eight medical students awarded AACOM’s Sherry R. Arnstein Minority Student Scholarship to enhance diversity in osteopathic medical schools. “A close friend of mine would always say, ‘you can’t be what you can’t see’…If you don’t see someone who looks like you in a career, you are less likely to ever consider that career,” Dulan said.

Savannah Seigneur, OMS II, from the Ohio University Heritage College of Osteopathic Medicine (OU-HCOM), spent her summer pitching for the Netherlands’ Golden League and finding a common denominator in two of her loves. “I love medicine and softball. They both demand a lot and require me to rise above the challenge,” Seigneur told The DO.

At its annual meeting in July, the American Osteopathic Association (AOA) House of Delegates voted down the proposed policy statement on physician assisted death. Anita L. Showalter, DO, who served on the end of life policy task force told The DO, “The consensus was that physician-assisted death is not compatible with the osteopathic oath.”

Jessica Marie Clark, OMS III, helped coordinate the A.T. Still University–Kirksville College of Osteopathic Medicine’s (ATSU-KCOM) annual Teddy Bear Clinic in February. During the clinics, local children and their stuffed toys learn what they can expect during a routine doctor’s appointment. Clark helped coordinate the event, and she said, “This is a great way for ATSU students and children to connect in a fun, meaningful way …. ATSU students are able to apply the information they’ve learned in an interactive environment that promotes health and wellness in our community.”

Shaun Knox, DO, PharmD, was one of two physicians honored by the Campbell University Jerry M. Wallace School of Osteopathic Medicine (CUSOM) for his outstanding achievement and contribution to the School’s Sports Medicine Fellowship. CUSOM Dean John M. Kauffman Jr., DO, FACOI, FACP, congratulated Dr. Knox, saying, “In Sports Medicine, you have many customers — the athlete, the coaches, the trainers … Dr. Knox and Dr. Qureshi both assimilated into the profession, and we are grateful for their service to the University and community.”

The Summer 2018 issue of the AOMA Digest reports that Vanessa Dawn Leonhard, OMS IV, from the Midwestern University Arizona College of Osteopathic Medicine (AZCOM) and her team were awarded the Golden Femur Award at the Arizona Osteopathic Medical Association’s 96th annual convention, which was held April 11-15 in Scottsdale. The Golden Femur Award is awarded to the COM team who prevails in a “quiz bowl”-style contest.

Jamie Christine Shawver, OMS III, and Starr Matsushita, OMS IV, received the Student Distinguished Service Awards from the Arizona Osteopathic Medical Association in April for providing significant contributions and service to the school, community and AOMA. Shawver is a student at the Midwestern University Arizona College of Osteopathic Medicine while Matsushita is a student at the A.T. Still University–School of Osteopathic Medicine.

The Arizona Osteopathic Charities awarded Ryan Paul Dyches, OMS IV, a scholarship for his essay answering the question “How do you plan to contribute to the future of osteopathic medicine in Arizona and the United States?” Dyches, one of two winners of 15 applicants, has been active in his school’s political action honor society, and he plans to continue advocating for osteopathic medicine in the state and national political arenas.

In a video on The DO, Anita L. Showalter, DO, agreed that physicians are at a high risk for violence, saying, “One of my trainers was killed in the parking lot of the hospital by a deranged patient, so that hit home to me.”

Send your news announcements to AAO Communications Specialist Lauren Good at LGood@academyofosteopathy.org.
Course Description
This course is an introductory course in visceral techniques to the thorax and thoracic viscera. Attendees will explore traditional osteopathic concepts of ventral technique as they apply to the thoracic viscera, ribs and anterior neck. Emphasis will be placed on physical examination, functional anatomy, and the anatomical relationships between diaphragm, ribs, sternum, thoracic spine and cervical spine, to the base of the skull, particularly as they relate to fascial continuity. Included will be discussion of the autonomic nervous system, vascular flow and lymphatic drainage.

Attendees will come away with improved confidence in physical examination, direct and indirect approaches to the ribs and thoracic viscera, and lymphatic techniques. Integration of visceral (ventral) techniques with spinal (dorsal) and cranial techniques will be emphasized at the conclusion.

This is an intermediate level course.

Prerequisites
It is strongly encouraged, though not required, that participants have taken a course in abdominal visceral approaches.

Course Times
Friday and Saturday from 8 a.m. to 5:30 p.m.
Sunday from 8 a.m. to 12:30 p.m.

Continuing Medical Education
20 credits of AOA Category 1-A CME anticipated.

Meal Information
Morning coffee and tea will be provided. Lunch will be provided Friday and Saturday. Notify AAO Event Planner Gennie Watts of any special dietary needs no fewer than seven days in advance.

Course Location
Rowan University School of Osteopathic Medicine
42 East Laurel Rd., Stratford, NJ 08084

Course Description
Sometimes referred to as Module 1, this introductory course is an excellent starting point on the journey of learning the fascial distortion model (FDM). FDM is an excellent modality to be used in the clinic, on the field, and in the emergency room for fast and effective results.

While there are some specific FDM techniques, emphasis will be placed on thinking and working in the model while using all manipulative modalities.

Attendees will be introduced to the theory of FDM while focusing on the shoulder, ankle and knee regions. Learn how FDM expands the toolbox you use to help more patients. This modality is valuable for any practitioner and no previous manipulation experience is required.

All medical providers are invited to attend, including DOs, MDs, PTs, OTs, PAs, NPs, DPMs, etc.

Course Times
Friday from 5 to 9 p.m.
Saturday and Sunday from 8 a.m. to 5 p.m.

Continuing Medical Education
20 credits of AOA Category 1-A CME anticipated.

Meal Information
Morning coffee and tea will be provided. Lunch will be provided Saturday and Sunday. Notify AAO Event Planner Gennie Watts of any special dietary needs no fewer than seven days in advance.

Course Director
Todd A. Capistrant, DO, MHA, earned both his doctor of osteopathic medicine degree and his master in health administration degree in 1997 from the Des Moines (Iowa) University College of Osteopathic Medicine. He is one of only three physicians in the United States who are currently certified to teach seminars on the FDM, and he is the president of the American Fascial Distortion Model Association.

Dr. Capistrant specializes in OMM, and he is certified by the American Board of Family Medicine. He is a member of the growing OMM department at the Tanana Valley Clinic in Fairbanks, Alaska, and he serves as a regional dean for the Pacific Northwest University of Health Sciences, College of Osteopathic Medicine in Yakima, Washington.

Dr. Capistrant is interested in working with athletes to maximize performance, dance medicine, and OMM for pregnant women. FDM allows for effective manipulative treatment for most musculoskeletal injuries including pulled muscles, fractures and frozen shoulders.

The arterial system is regulated by the autonomic nervous system. The arteries can show a lack of distensibility/mobility when there is a retained tension in the vessel walls. In this class, participants will evaluate the mobility of the abdominal organs, then palpate and evaluate the arteries that supply those organs. When the organ is moved in such a way that the arterial pulsation to the organ is improved, it is held for 20 seconds, resulting in improved visceral function.

Participants will palpate, evaluate and treat the following structures: abdominal aorta, spleen and splenic artery, stomach, left and right gastric arteries, gastro mental artery, liver, gall bladder and common and proper hepatic arteries, pancreas, duodenum and pancreaduodenal artery, small intestine, superior mesenteric artery, large intestine, colic arteries, kidneys, renal arteries, inferior mesenteric, aortic bifurcations, common iliac arteries, internal iliac arteries, external iliac arteries, uterine artery, and internal pudendal artery.

This is an intermediate level course.

Course Times
Friday and Saturday, 8 a.m. to 5:30 p.m.
Sunday, 8 a.m. to 4 p.m.

Continuing Medical Education
22 credits of NMM-specific AOA Category 1-A CME anticipated.

Meal Information
Morning coffee and tea will be provided. Lunch will be provided each day. Notify AAO Event Planner Gennie Watts of any special dietary needs no fewer than seven days in advance.

Brain Therapy for Neonatal Reflexes & Lifelong Reflexes in Adults and Children

Course Description
Many children and adults have neurological disorders, learning disabilities or cognitive challenges. Studies show these individuals often have retained or reoccurring neonatal/primary reflexes. Optimally, these reflexes are inhibited in the first months of life. Neonatal reflex inhibition allows for more sophisticated neurological structures to develop.

Adults can see the reoccurrence of these neonatal/developmental reflexes in many pathologies, including trauma, PTSD, Parkinson’s, stroke, dementia, etc.

In children, these reflexes can be found in many dysfunctions including learning disabilities, sensory integration dysfunctions, trauma, cerebral palsy, ADD/ADHD, concentration problems, auditory, visual or vestibular issues, poor postural control, dyslexia, speech language delays, ASD, Down syndrome, etc.

There are approximately 28 neonatal reflexes at birth. We will go over most of these reflexes using quick, precise and efficient osteopathic CNS techniques to help integrate them. Inhibitory movement patterns will also be presented.

Prerequisite
Registrants must have taken Dr. Chikly’s “Brain 1” course or at least two cranial courses.

Continuing Medical Education
24 credits of NMM-specific AOA Category 1-A CME anticipated.

Course Times
Sunday and Monday from 8:30 a.m. to 6 p.m.
Tuesday from 8:30 a.m. to 4:30 p.m.

Meal Information
Breakfast and lunch are on your own. Coffee and tea will be provided.

**Course Description**
The Fascial Distortion Model is a model of thinking that allows clinicians to utilize patients’ gestures and verbal descriptions to focus soft tissue treatment for fast and effective relief of pain. By incorporating the FDM with traditional OMM techniques, powerful results can be achieved. By applying the FDM philosophy to your practice, you can decrease treatment time and improve outcomes.

No previous experience with the FDM will be required. For those familiar with the FDM, this is an opportunity to gain a deeper understanding. This will be an excellent introduction to the model and a good starting point on the journey of incorporating FDM into your practice. The second part of the course will be focused on incorporating the FDM with concepts such as visceral manipulation, cranial manipulation, dry needling, and frequency specific microcurrent therapy. The use of FDM in the pediatric population and FDM treatment of fractures also will be discussed.

**Continuing Medical Education**
24 credits of NMM-specific AOA Category 1-A CME anticipated.

**Course Times**
Sunday through Tuesday from 8 a.m. to 5 p.m.

Course Description
In this course, attendees will explore the anatomy and function of the lymphatic system, in relationship to the visceral movement. When the lymphatics of the viscera are obstructed, the lymphatic and interstitial fluids back up, increasing the tension in the visceral attachments. This is associated with a decreased mobility of the organs, a visceral dysfunction. Of the nearly 450 lymph nodes in the body, about two-thirds are associated with the viscera.

Osteopathic approaches to the lymphatics began with Dr. Still. Those approaches were passed on to his students such as William Garner Sutherland, John Martin Hiss, Elmer Barber, Frank Chapman and Frank P. Millard. Some of these students expanded on what they had learned from Still. Only in the last 40 years has modern science discovered that the lymphatic system actually contracts and propels the lymphatic fluids, through what is called lymphangions, or “lymph hearts.” This contraction and movement is palpable and useful in diagnosing and treating a large range of osteopathic and medical issues.

Leading, Expanding and Cutting: The Edges of Osteopathic Medicine

Rebecca E. Giusti, DO, program chair
Residency Program Directors’ Workshop

March 17, 2019 • Rosen Shingle Creek in Orlando, Florida

Course Director
Darren Grunwaldt, DO, is the program director for ACGME accredited ONMM residency and the AOA accredited FM/NMM residency at Metro Health - University of Michigan Health in Wyomng, Michigan. Except for one year as a new attending in Mount Clemens, he has been working as a resident, then faculty, then program director at Metro since 2005. Dr. Grunwaldt graduated from MSUCOM in 2005 and from the AOA accredited FM/OMM integrated residency at what was then called Metropolitan Hospital in Grand Rapids, Michigan in 2009. He continues to serve the greater MSU area through the Statewide Campus System coordinating didactics for the NMM residency members there and giving occasional workshops for the other residencies involved with SCS.
