Kendi L. Hensel, DO, PhD, FAAO, of Fort Worth, Texas, was installed as the 2019-20 president of the American Academy of Osteopathy on March 16 during the AAO’s annual Convocation in Orlando, Florida. Before becoming president, Dr. Hensel served for one year as the president-elect of the AAO. The AAO’s 2018-19 president, Catherine M. Kimball, DO, of Waterville, Maine, will continue in an advisory role as the 2019-20 immediate past president.

Dr. Hensel is an associate professor in the Department of Osteopathic Manipulative Medicine at the University of North Texas Health Science Center’s Texas College of Osteopathic Medicine. In 2011, she completed a National Institutes of Health–funded study on OMM in pregnancy.

As an enthusiastic advocate for osteopathic medicine, Dr. Hensel focused on the evolving osteopathic identity in her inaugural address. She told her colleagues, “Part of what binds us as an organization is our shared joy in teaching as well as our passion for osteopathy. We are pulled together by servant leaders who share that passion for osteopathic medicine and this organization.” She went on to say, “We have a wealth of shared experiences that are based on a joy of helping others, a common passion for this work, and an openness with our patients and our colleagues. This is what sets us apart as our distinctive identity.”

In 1998, Dr. Hensel graduated from the Oklahoma State University College of Osteopathic Medicine in Tulsa. She completed...

Dr. Rennie, 2019-20 president-elect (continued from Page 1)

A graduate of the Des Moines College of Osteopathic Medicine in Iowa, Dr. Rennie has chaired the Department of Osteopathic Manipulative Medicine at the Touro University Nevada College of Osteopathic Medicine (TUNCOM) in Henderson for 11 years. He is board certified in NMM/OMM and in osteopathic family medicine.

Dr. Rennie has dedicated himself to preserving the ideals of osteopathic medicine, and he is very active in the profession nationally. He previously served on the AAO’s Board of Governors and Board of Trustees, and for more than 16 years, he has worked with the Educational Council on Osteopathic Principles, a national collaboration dedicated to developing curriculum for osteopathic principles and practice. He has also served with the National Board of Osteopathic Medical Examiners since 1997, developing assessment services for the osteopathic profession. In addition, he has spent 12 years as a member of the NMM/OMM certifying board, the American Osteopathic Board of Neuromusculoskeletal Medicine.

As the OMM department chair at TUNCOM, Dr. Rennie coordinated with faculty to develop a curricular database for the undergraduate OMM program that employs a Regional Anatomic and Methodology Progressive System (RAMPS) approach. In addition, he is the author of Counterstrain and Exercise: An Integrated Approach, which outlines a more learnable anatomical approach to the counterstrain methodology, and he is a coauthor of the strain-counterstrain chapter for the second through fourth editions of Foundations of Osteopathic Medicine, the most widely used textbook in the field.
committee consisting of Laura E. Griffin, DO, FAAO, and Lisa Ann DeStefano, DO; her husband, Shannon, and “the best stepdaughter anyone could ask for,” Kaylin; and finally, her parents, who were unable to attend in person but attended via FaceTime.

Dr. Hensel’s address has been edited for the AAO Member News:

We’ve had a lot of challenges lately. And one of the things I keep hearing is how we’re going to lose our osteopathic identity. That these challenges are going to rob us of our identity—they’re going to diminish our identity. I hear a lot of fear about DOs and the osteopathic profession “losing its identity.”

So it made me wonder What is identity? Is it possible for a person or an entity to lose identity?

To answer that we have to look at what our identity is rooted in. Identity is defined as:

- The state of remaining the same one or ones, as under varying aspects or conditions
- Condition or character as to who a person or what a thing is; the qualities, beliefs, etc. that distinguish or identify a person or thing
- The sense of self, providing sameness and continuity in personality over time

**Individual Identity**

Is our identity in our stuff? In our houses, fancy cars, clothes? If so, then Marie Kondo would be out of business. Is our identity in our positions or titles? Is it illness, injuries, or diagnoses that we’ve been given? Is it in our illness or disorders?

What about affiliations? Sports teams, state allegiances, colleges—all of these can be source components of identity. But are they the nature of who we are?

Is identity in how we look?

Patrick Hardison, a Mississippi firefighter who was burned extensively while responding to a fire, received a face transplant. So over a few years’ time, his appearance radically changed. Even though he now has someone else’s face, isn’t he still Patrick Hardison? Most of us would agree yes.

Even in the cases of other transplants, such as heart, hands, or eyes, people remain themselves. Under those varying conditions, they have the same identity.

Is identity in our brains? Our thoughts, knowledge, perspective? How we process information? Is it how we think? Brain scans clearly show a difference in brain activity during pain and during meditation, showing that certain thoughts or activities can change brain function. We know our brains look and act differently under different conditions. So is our brain function our identity?

Brains with cognitive impairment or Alzheimer’s disease look demonstrably different. If we lose all that? Who are we? Does Alzheimer’s or amnesia change our identity?

So if a personal identity relates to self-image, one’s mental model of oneself, self-esteem and individuality, who are we really?

**Organizational Identity**

With the AAO, what is our identity as an organization? What is our focus?

Our identity as the AAO is as a provider of education, advocacy and research. We take all these other factors, needs and opportunities, and we focus them to what matters most to us—to what defines us.

We envision a world where all patients are aware of and have access to osteopathic medical care and osteopathic manipulative medicine for optimal health.

Our mission is to teach, advocate, and research the science, art and philosophy of osteopathic medicine, emphasizing the integration of osteopathic principles, practice and manipulative treatment in patient care.

So how do we see ourselves?

We are doctors. We are the workhorses. We have endured years of education. We are trained to care for our fellow humans in difficult circumstances. We have a duty to

**NOW HIRING - CHAIR OF OPP AND FACULTY**

California Health Sciences University (CHSU) is in search of a Chair for OPP, and full time OPP and Clinical faculty for the College of Osteopathic Medicine (COM). The primary responsibilities involve teaching osteopathic medical students components of a clinical curriculum with attention to the tenets, principles, and practices of osteopathic medicine.

**Minimum Qualifications:**

- For Chair, certified through the AOBNNM or AOBSPOMM.
- Osteopathic physicians in any specialty, with significant experience and comfort teaching OPP/OMM.
- Target audience for faculty teaching is primarily medical students, faculty, and potentially residents as the COM develops.

**Visit chsu.edu/employment-opportunities for more information**

Founded in 2012, CHSU offers a local option to train pharmacy and osteopathic students to help remedy the shortage of health care services offered in the Valley.

**STUDENT ORIENTATION BEGINS JULY 20, 2020**

our patients. We work in broken systems, against many roadblocks and obstacles, against many things that can sap our enthusiasm and demoralize us.

We are educators: of patients, of students, of residents, of our colleagues, of the public. We are most often identified this way.

We are osteopathic physicians: at one time, the zebras of medicine. What is a DO? My thanks to Rebecca E. Giusti, DO, for this definition:

• Fully qualified physicians
• Trained within a context of a distinct patient-centered, health-oriented philosophy
• Who combine specialized diagnostic and therapeutic hands-on skills (OMM) with the latest advances in medical technology
• To offer the most comprehensive care available

We are a different breed!

We are like an okapi. It lives in remote areas and wasn’t even discovered until 1901. It kind of looks like a horse, but maintains its distinctiveness like a zebra, and it is actually the closest relative to the giraffe. Like us, who are workhorses, maintaining our distinctiveness, and most easily recognized as educators.

What is our identity in the AAO?

According to the Harvard Business Review, there are three elements of a strong corporate identity:

• The value we offer our customers
• The capabilities that allow us to create value
• The set of products and services that delivers that value

Looking at that within the Academy, firstly, we are physicians. This is the capability that allows us to create value. Our capability is you—the physicians that have these skills, that want to teach these skills and use these skills to help our patients.

We are educators. This is the value that we offer our customers—the learning of osteopathic skills, the application of those skills in patient care, and the research of the effects that the osteopathic approach provides.

We are a different breed! This is the camaraderie in our profession that sets us apart.

We have a proud heritage that links us to our past, and a genealogy that sets us in our place of learning between our mentors and our students.

We are a different breed. This is the camaraderie in our profession that sets us apart.

We have a wealth of shared experiences that are based on a joy in helping others, a common passion for this work, and an openness with our patients and colleagues. This is what sets us apart.

So… Can we lose our identity? If our identity is rooted in who we are as educators, as osteopathic physicians, our shared history, and our dedication and passion for our work, then, no, that’s not something we can lose. Our identity is in the work. Our organizational identity is in our service and value to our members.

We do have some rough times ahead. Many changes are in the works that could cause us to feel anxious about our future. But these are not challenges to our identity.

(continued on Page 6)
AAO Members Elect Representatives for 2019-20

At the AAO’s annual business meeting on Thursday, March 14, in Orlando, Florida, Academy members cast their votes for members of the AAO’s Board of Trustees, Board of Governors and Nominating Committee in addition to selecting the 2019-20 president-elect and the 2019-22 secretary-treasurer.

The following members were elected to serve the AAO:

**President-elect**
Paul R. Rennie, DO, FAAO

**Secretary-treasurer**
Judith A. O’Connell, DO, MHA, FAAO

**Trustees**
Stefan Hagopian, DO, FAAO
Kurt P. Heinking, DO, FAAO

**Governors**
Kelly A. Busby, DO
Michael S. Carnes, DO, FAAO*
Leslie M. Ching, DO
William H. Devine, DO*
Heather P. Ferrill, DO, MS MEdL
Raymond J. Hruby, DO, MS, FAAODist*

Michael L. Kuchera, DO, FAAO, FNAOME*
J’Aimee Anne Lippert, DO*
Brian Loveless, DO
Michael P. Rowane, DO, MS, FAAFP, FAAO
William H. Stager, DO, MS, MH, FAAFP, FAAAMA, FAAO, FACOFP dist.
Col. Ralph C. Walsh Jr., DO

**Nominating Committee**
Boyd R. Buser, DO, FACOFP dist.*
Jane E. Carreiro, DO*
Dennis J. Dowling, DO, MA, FAAO*
Laura E. Griffin, DO, FAAO*
Catherine M. Kimball, DO (ex-officio)

*Asterisk indicates incumbents who were re-elected.

**Residents and Students**

**Select Executive Councils**
At their annual business meeting on Friday, March 15, the resident members of the American Academy of Osteopathy elected the following representatives to comprise their 2019-20 Executive Council: Amy Joy Selwach, DO, MBA, chair; Laura H. Gurenlian, DO, vice chair; Elizabeth Syataslavna Balyakina, DO, secretary; Chelsy Marie Stephenson, DO, treasurer; and Christina Brianne Cherry, DO, national coordinator. Marta Elisabeth Bringhamhurst, DO, who served as RAAO president from 2017 to 2019, will serve as the council’s immediate past chair.

Members of the Student American Academy of Osteopathy also elected their Executive Council representatives on Friday, March 15. Congratulations to Danielle D. Dukes, OMS III, chair; Matthew J. Spousta, OMS II, vice chair; Sarae A. Sager, OMS III, secretary-treasurer; and Kristyn M.A. Lester, OMS II, national coordinator. Paula M. Archer, OMS IV, who served as the 2018-19 chair, will round out the council as the immediate past chair along with Samantha K. Tyler, OMS IV, NUFA liaison. The National Undergraduate Fellows Association selected Student Doctor Tyler as their liaison during their program on March 13.

As chairs of their respective councils, Dr. Selwach and Student Doctor Dukes will serve on the AAO’s Board of Trustees as the resident trustee and student trustee, respectively.

---

**President’s message (continued from Page 5)**

It is a challenge to our structure. To our processes.

During the California merger in the 1950s and ’60s, George W. Northup, DO, was the president of the American Osteopathic Association, and in 1959, he was asked if there was a purpose in the continuation of the osteopathic profession. He said, “Do we or do we not have a contribution to make to medicine not now being accomplished through the efforts of [the AMA or] any other organization?” I think we can all agree the answer is yes, both then and now.

My friend Stevan A. Walkowski, DO, wrote this last fall: “Osteopathy will continue because Osteopathy is a reflection of the highest principles of Life. Our challenge as Osteopaths is to keep doing our work, THE work. Osteopathy will survive because it is bigger than all of us.”

Thank you, Steve, and thank you all.
Richard A. Feely, DO, FAAO, Awarded A.T. Still Medallion of Honor

Richard A. Feely, DO, FAAO, of Chicago, received the American Academy of Osteopathy’s highest honor on March 16 during the AAO’s Convocation in Orlando, Florida. Named the Andrew Taylor Still Medallion of Honor, the award is given to AAO members who have exhibited an exceptional understanding and application of osteopathic principles and concepts and for outstanding accomplishments in scientific or professional affairs. The award is named after Andrew Taylor Still, MD, DO, the founder of osteopathic medicine.

A 1978 graduate of the A. T. Still University Kirksville College of Osteopathic Medicine in Missouri, Dr. Feely maintains the Feely Center for Optimal Health with offices in downtown Chicago and Olympia Fields, Illinois. The Feely Center for Optimal Health is an integrative osteopathic medical practice that treats children with special needs as well as adults suffering from neuromusculoskeletal pain and dysfunction. The practice extends to medical legal work concerning soft tissue injuries, chart reviews, disability determinations, independent medical examinations, utilization review and quality assurance programs for TIVITY Health, Inc., as well as with various insurance companies and law firms.

Dr. Feely also is an associate professor at the Midwestern University Chicago College of Osteopathic Medicine in Downers Grove, Illinois, and he mentors residents at his office and at Franciscan Health in Olympia Fields. He is certified by the American Osteopathic Board of Neuromusculoskeletal Medicine, the American Osteopathic Board of Family Physicians, the American Board of Medical Acupuncture, the American Board of Independent Medical Examiners, and the American Board of Quality Assurance and Utilization Review Physicians (ABQAURP). In addition, he has attained fellow status with the AAO, The Osteopathic Cranial Academy, the American Academy of Medical Acupuncture, the International Academy of Independent Medical Examiners and the ABQAURP.

In his continued commitment to teaching the next generation of osteopathic clinicians around the world, Dr. Feely has lectured extensively in Europe, Asia and North America. The focuses of his lectures are osteopathic cranial manipulative medicine, osteopathic principles and practices, osteopathic manipulative treatment, osteopathic manipulative medicine and acupuncture. During 2016 and 2017, Dr. Feely was a consultant for the World Health Organization (WHO) on Integrative Medicine at workshops in Macao to over 30 countries’ representatives on how to ensure quality traditional and complementary medicine services.

Dr. Feely has served the osteopathic profession as president of many organizations, including the AAO, the Illinois Osteopathic Medical Society, the Foundation for Osteopathic Research and Continuous Education, The Osteopathic Cranial Academy and the Osteopathic Cranial Academy Foundation, and he has shared his professional dedication with the Catholic church through work in Lourdes, France, and in Beirut, Lebanon. He is a Knight of Magisterial Grace in Obedience (KMOB) in the Order of St. John of Jerusalem, Rhodes, and Malta, which is a Catholic religious lay order with a rich, 900-year history.

Follow AAO online!
Malinda M. Hansen, DO, MS, of Fort Worth, Texas, was named the 2019 Resident of the Year by the American Academy of Osteopathy (AAO) on March 14 during the AAO’s annual meeting during its Convocation in Orlando, Florida. The award recognizes a resident who has contributed to the AAO; who has contributed to osteopathic principles and practices (OPP) at his or her residency program; and who has participated in such educational events as the AAO’s annual Convocation and the AAO’s program at the American Osteopathic Association’s annual conference. Dr. Hansen is the tenth osteopathic resident to receive this award. She is finishing a combined family medicine and osteopathic neuromusculoskeletal medicine (FM/ONMM) residency at the University of North Texas Health Science Center (UNTHSC) in Fort Worth.

Malinda M. Hansen, DO, MS, was named the AAO’s Resident of the Year during the annual business meeting on March 14.

As a 2015 graduate of the A.T. Still University School of Osteopathic Medicine in Arizona (Mesa), prior to medical school, Dr. Hansen played Division I athletics and started a business where she trained athletes across the spectrum of sports and competitive activities. This led her back to graduate school to get a master’s degree in exercise physiology and ultimately to medical school.

During medical school and residency, Dr. Hansen has been actively involved with the AAO, teaching seminars for students as well as table training for UNTHSC attendings who have presented. Throughout her residency, she has been covering UNT athletes and has had significant exposure to musculoskeletal injuries, treatments and rehabilitation. In July 2019, she will be starting a sports medicine fellowship at the University of Louisville.

In her nomination letter for resident of the year, Dr. Hansen explained that she has realized leadership takes on the necessary form to have the best outcome and she has adapted to the ever-changing roles of leadership. She stated that she loves to teach and that her skills have deepened with her experiences during residency.

Dr. Hansen was nominated by David C. Mason, DO, MBA, FACOFP, program director for the UNTHSC integrated FM/ONMM residency. In his nomination letter, Dr. Mason stated that Dr. Hansen has demonstrated strong leadership, is a problem-solver and is very adept at teaching students, residents and patients. He indicated that because of her ability to effect change and make improvements, the residency program will benefit far into the future because of her process improvement projects.

Complete Convocation Surveys by April 30

Thank you to the almost 1,200 registered attendees who attended the AAO’s 2019 Convocation, March 13-17, in Orlando, Florida. Please complete the surveys by April 30 to let us know how well we met your expectations.

Physician surveys:
- Program survey
- Overall survey

Student surveys:
- Thursday program survey

As always, please feel free to contact us at info@academyofosteo.org or at (317) 879-1881 with additional feedback or questions.

Presentations and Audio Recordings
Download available presentations at www.academyofosteo.org/aaq-2019-convocation. Presentations will be uploaded as they are received.

To receive audio recordings of the lectures, download the order form and return it to ConTape.

CME
Continuing medical education credits earned at Convocation will be reported to the American Osteopathic Association within 60 days.

Visit www.academyofosteo.org/CME for upcoming CME opportunities from the AAO.

Visit www.academyofosteo.org/CME for upcoming CME opportunities from the AAO.

Visit www.academyofosteo.org/CME for upcoming CME opportunities from the AAO.
Thank You to Convocation Exhibitors

The 2019 Convocation attracted 39 exhibitors from a variety of fields—from residency programs to board prep to skin care. Special thanks to the Okemos Osteopathic Center for sponsoring the 2019 Fun Run and to Osmosis.org and the Columbus Osteopathic Association for providing awards and snacks, respectively, for the run.

In Memoriam: Richard G. Huff, DO

Richard Grey Huff, DO, age 75, died on Jan. 28, 2019, from complications associated with prostate cancer. He died after a short stay surrounded by his loving family at the Leila and Cyrus Poppen House Hospice Residence.

Born May 7, 1943, in St. Louis, Dr. Huff grew up in Kirksville, Missouri. After graduating from Truman State University in 1965, he graduated from the Kirksville College of Osteopathic Medicine in 1970. He completed a postgraduate year teaching as a neuroanatomy and neurology fellow, and he completed his training as an intern at Muskegon General Hospital in Michigan.

Dr. Huff and his wife, Patricia, settled in western Michigan, and he was a devoted osteopathic physician there for 49 years. He was an innovator in manipulative practice, and over the years he developed techniques that will be collected in a soon-to-be-published book. During his time as a physician, he was an emergency room physician for six years, was in private practice for over 30 years, and was the western Michigan regional medical director for the Office of Healthcare at the Michigan Department of Corrections overseeing health care for 4,500 prisoners during his tenure of more than 25 years.

In November 2016, the Osteopathic Foundation of West Michigan announced a gift to the Richard G. and Patricia R. Huff Children’s Support Fund, a donor-advised fund of the Grand Haven Area Community Foundation. The gift was made in honor of Dr. Huff and his nearly 50-year career as a master clinician and teacher of osteopathic manipulative medicine. Throughout his career, he treated thousands of western Michigan patients and trained many osteopathic residents who now treat patients nationwide. His leadership was instrumental in forming the Mercy Health Physician Partners Manipulative Medicine Clinic, which serves a dual purpose of treating patients and advancing the osteopathic manipulative medicine residency program at Mercy Hospital in Muskegon.

When he wasn’t helping patients, Dr. Huff enjoyed playing golf and socializing with friends at the Spring Lake Country Club. He pursued a lifelong interest in commodity trading, avidly read espionage and crime fiction, continuously studied osteopathic literature, listened to music, and appreciated great wines and memorable meals.

Those wishing to make a memorial contribution in honor of Dr. Huff are encouraged to support the Richard G. and Patricia R. Huff Children’s Support Fund which supports a variety of children’s initiatives in local schools. Contributions may be directed to the Grand Haven Area Community Foundation with a notation in the memo to the Richard G. and Patricia R. Huff Children’s Support Fund.

Member Notices

AOBNMM Testing
If you are interested in certifying or re-certifying in neuromusculoskeletal medicine, please note the American Osteopathic Board of Neuromusculoskeletal Medicine will offer the oral/practical exam Sept. 28-29 at the Sheraton Suites in Rosemont, Illinois, near O’Hare International Airport. Applications are available online at www.aobnmm.org and must be submitted no later than Aug. 8. The written exam will be administered through PearsonVUE testing centers Oct. 11-20.

Find a Physician
Make sure prospective patients can find you in the AAO’s Find a Physician search at www.FindOMM.org. If your name does not appear in the search results, follow the instructions on the FAQ page.

Stay Connected!
If you have moved or changed homes or offices in the past year, please update your contact information in your account at www.academyofosteopathy.org to ensure you don’t miss any important communications from the AAO office. 2018-19 Golden Ram Campaign Nears Goal

The AAO’s 2018-19 Golden Ram campaign, which launched July 1, 2018, and closes July 30, 2019, has garnered donations totaling $19,184 from 50 donors as of March 31, 2019. We are 96% of the way to our $20,000 goal, and with your help, we are confident we can exceed it. Donate now.

Established in 1987, the Golden Ram Society is the primary fund that supports the Academy’s mission. Because the Academy cannot operate on dues revenue alone, generous contributions to the Golden Ram Society allow the AAO to offer quality educational programs at reasonable rates, develop new programs using new technology and expand the AAO’s public education efforts.

Donations to the 2018-19 Golden Ram campaign can be made online by logging on to www.academyofosteopathy.org. Donations also may be mailed to the Golden Ram Society, American Academy of Osteopathy, 3500 DePauw Blvd., Suite 1100, Indianapolis, IN 46268-1136.

You can set up recurring monthly donations of $25 or more. Call AAO Executive Director Sherri L. Quarles at (317) 879-1881, ext. 214, for more information.

<tr>
<td>Lawrence LeBeau, DO; Christine Morgan, EdD; Deborah M. Heath, DO; Vanessa K. Pazdernik, MS</td>
<td>February 2019</td>
<td>Assessing Competency in Family Medicine Residents Using the Osteopathic Manipulative Medicine Mini-Clinical Evaluation Exercise</td>
<td>The Mini-Clinical Evaluation Exercise (Mini-CEX) is one example of a direct observation tool used for workplace-based skills assessment. The Mini-CEX has been validated as a useful formative evaluation tool in graduate medical education. However, no Mini-CEX has been reported in the literature that specifically assesses the osteopathic manipulative medicine (OMM) skills of family medicine residents. Therefore, the authors created and studied an OMM Mini-CEX to fill this skills assessment gap. The results suggest the OMM Mini-CEX can be a useful direct observation evaluation tool to assess OMM core competencies in family medicine residents.</td>
</tr>
<tr>
<td>Wei Cheng Yuet, PharmD; Dhvani Derasari; Jon Sivoravong, DO; David C. Mason, DO, MBA, FACOFP; Michael Jann, PharmD</td>
<td>February 2019</td>
<td>Selective Serotonin Reuptake Inhibitor Use and Risk of Gastrointestinal and Intracranial Bleeding</td>
<td>Although selective serotonin reuptake inhibitors (SSRIs), which are among the most commonly prescribed medications in the U.S., are highly tolerable relative to other antidepressants, they are associated with a number of adverse effects, including increased gastrointestinal tract bleeding and intracranial bleeding. The purpose of this article is to review the incidence of gastrointestinal tract bleeding or intracranial bleeding associated with concomitant SSRI use, the proposed mechanisms of, and the potential pharmacokinetic or pharmacodynamic interactions with anticoagulants and antiplatelets.</td>
</tr>
<tr>
<td>Tami Hendriksz, DO; Stacey L. Pierce-Talsma, DO, MS-EdL, FNAOME</td>
<td>February 2019</td>
<td>Osteopathic Manipulative Medicine Use in Pediatric Patients With Pertussis</td>
<td>In this OMT Minute, the authors demonstrate how osteopathic manipulative treatment can be applied to patients who have pertussis, or whooping cough, a severe, potentially life-threatening disease caused by the bacteria <em>Bordetella pertussis</em> and one of the most prevalent vaccine-preventable diseases in the United States.</td>
</tr>
<tr>
<td>Stacey L. Pierce-Talsma, DO, MS-EdL, FNAOME; Samuel Ji, OMS III; Melissa Pearce, DO; Joel Talsma, MS</td>
<td>March 2019</td>
<td>Muscle Energy for the Occipitoatlantal Joint</td>
<td>The occipitoatlantal (OA) joint is an important component among the complicated anatomy of the suboccipital region. A combination of dysfunction in the motion and positioning of the joint, abnormal tension of nearby musculature and ligamentous structures, and compression of significant cranial and spinal nerves is thought to contribute to pain in certain types of headaches. In this OMT Minute, the authors explain how to use muscle energy techniques to relieve somatic dysfunction in the OA joint.</td>

<td>Carolyn Komar, PhD; Mohammed Ahmed, DO; Agape Chen, OMS III; Hannah Marie Richwine, OMS IV; Nida Zia, DO; Andrea Nazar, DO; Laurie Bauer, DO</td>
<td>March 2019</td>
<td>Advancing Methods of Assessing Bone Quality to Expand Screening for Osteoporosis</td>
<td>Dual–energy X-ray absorptiometry (DXA) limits osteoporosis screening because of machine size, technical requirements for operation, and exposure to ionizing radiation. To establish data ranges from calcaneus ultrasonography (US) that correspond to bone mineral density (BMD) stratification identified by DXA and to determine whether vitamin D concentration adds to US bone health assessment, patients scheduled for DXA at the Robert C. Byrd Clinic, a rural primary care facility in Lewisburg, West Virginia, were recruited from June 2015 to June 2016. Ultrasonography was used to scan the left and right calcaneus of the patients, and blood was collected from a finger prick for vitamin D analysis. Information was collected regarding Fracture Risk Assessment tool parameters, menstrual history, and drug and supplement use. Ultrasonography readings of either the left or right foot were predictive of good vs poor bone quality, and the authors concluded that ultrasonography of the calcaneus offers a low-cost, efficient means to screen bone health.</td>
</tr>
<tr>
<td>Benjamin Houston Greiner, OMS III, MPH; Denna Wheeler, PhD; Julie Croff, PhD, MPH; Bridget Miller, PhD</td>
<td>March 2019</td>
<td>Prior Knowledge of the Mediterranean Diet Is Associated With Dietary Adherence in Cardiac Patients</td>
<td>To understand how familiarity with the Mediterranean diet affects dietary habits in cardiology patients by using social cognitive theory, this cross-sectional study included patients at a metropolitan outpatient cardiology clinic in Oklahoma. A survey was used to analyze patient knowledge of the Mediterranean diet. Patients were separated into low–, medium–, and high–diet adherence groups based on their daily consumption of fruits, vegetables, fish, whole grains, and nuts. Multinomial logistic regression was used to analyze patients’ knowledge of Mediterranean diet principles with dietary adherence. The authors found that familiarity with the Mediterranean diet was closely associated with adherence to its principles, indicating that patient education on heart-healthy diets may improve the eating habits of patients, especially patients at risk for cardiac events.</td>

Arkansas College of Osteopathic Medicine (ARCOM) announced its new dean: Rance L. McClain, DO, FACOFP, FAOASM. Dr. McClain began his new position Jan. 1, 2019. Prior to joining ARCOM, Dr. McClain was the associate dean for clinical sciences at the William Carey University College of Osteopathic Medicine in Hattiesburg, Mississippi.

The Midwestern University Arizona College of Osteopathic Medicine named named Ian Zhi-hao Coker, OMS III, its 2018 Student DO of the Year. In addition to serving as the president of the Student Association of the American College of Osteopathic Family Physicians, Coker has been active as a table trainer in AZCOM’s Osteopathic Manipulative Medicine Department, and he established a group to supplement nutritional education at a local middle school.

Andrew E. Lelchuk, OMS IV, from the Nova Southeastern University Dr. Kiran C. Patel College of Osteopathic Medicine co-authored two articles that will be presented at the Society of American Gastrointestinal

(continued on Page 14)

(continued from Page 13)

and Endoscopic Surgeons (SAGES) Conference in April 2019 in Baltimore.

Alyssa Morgan Ritchie, OMS IV, is the Ohio University Heritage College of Osteopathic Medicine (OU-HCOM) 2018-19 Student DO of the Year. As a professional researcher, community advocate, and leader, Ritchie has compiled an impressive list of accomplishments.

Matthew Brandon Barker, DO, of Southlake, Texas, was a recipient of a 2018 scholarship to attend OMED, courtesy of the American Osteopathic Association’s Bureau of Emerging Leaders. Dr. Barker, who was in his final year of residency, told The DO, “Being at OMED was like being around family as I got to see old friends and make new ones.”

Stasia Blyskal, DO, of New York, explained how she uses her hands to help dancers and emphasized why less is more on an episode of the “Dance Well” podcast.

Danielle L. Cooley, DO, of Stratford, New Jersey; Gretta A. Gross, DO, MEd, FACOFP, of York, Pennsylvania; and Karen T. Snider, DO, FAAO, of Kirksville, Missouri, shared their perspectives as women in medicine with the National Board of Osteopathic Medical Examiners. Their stories touch on facing challenges during medical school, their female role models, words of advice to future DOs and their contributing talents to osteopathic medicine.

Kimberly J. Wolf, DO, of Vallejo, California, hosted a webinar for the American Association of Colleges of Osteopathic Medicine on Feb. 6, 2019, titled “Distinctive Osteopathic Pediatric Residency Curriculum.” The webinar described the curriculum and components of the Pediatric Residency Program at Nationwide Children’s Hospital, the first pediatric program to receive Accreditation Council for Graduate Medical Education Osteopathic Recognition.

Manonmani Murugappan, OMS II, from the Nova Southeastern University Dr. Kiran C. Patel College of Osteopathic Medicine, was named the overall winner in the clinical/case study category for her project “Validation of Bayesian Adaptive Quick Contrast Sensitivity Function Tests in Adults Without Ocular Disease” during the Council of Osteopathic Student Government Presidents (COSGP) Research Symposium on Jan. 18 in Fort Worth, Texas.
Mindful Relationships:
Seven Skills for Success—
Integrating the Science of Mind, Body and Brain
B. Grace Bullock

ISBN: 978-1909141704
189 pp., Paperback
$29.50 ($26.55, member price)

Human existence depends on relationships. Our brains rely on interconnected neural networks to function. Our minds relentlessly encode complex matrices of meaning to make sense of the world. And our physical and psychological development is contingent on the social bonds we share with others. *Mindful Relationships: The Seven Skills for Success* integrates the science of mind, body and brain to reveal how stress undermines these relationships, and what we can do about it. Chronic stress threatens our wellbeing and relationship success by creating systemic dysregulation of the mind, body and brain. This dysregulation leaves us relying on primal defense strategies like ....

The Five Osteopathic Models:
Rationale, Application, Integration—From an evidence-based to a person-centered osteopathy
Raymond J. Hruby, editor, American edition

ISBN: 978-1909141681
224 pp., Paperback
$75 ($67.50, member price)

Far from being simply a sequence of techniques, as practiced in many countries, osteopathy is an independent primary health care system based on principles applied through a manual practice: a unique profession that takes care of the whole person through the application of five models (biomechanical, neurological, respiratory-circulatory, metabolic, and behavioral). These conceptual models of the relationship between structure and function allow osteopaths to evaluate treatment with the aim of promoting health rather than curing disease. This book is intended as a manual for both students and osteopathic ....

Foundations of Morphodynamics in Osteopathy
Torsten Liem
and Patrick Van den Heede, editors

ISBN: 978-1909141247
703 pp., Hardcover
$110 ($99, member price)

In 35 chapters written by the editors and a team of internationally renowned contributors, the book covers the underlying principles of osteopathic palpation from a biodynamic and “morphodynamic” perspective, and their application in the cranial field and the spinal cord. It emphasises the importance of considering not just the patient’s physical self, but also the inner consciousness. It teaches how to assess tissue-energy characteristics, and to use this understanding in managing the whole patient. The work discusses biophysical, neurobiological and psychological interactions as well as the interplay of developmental dynamics and further epigenetic influences on the organism. As well as the primary respiratory mechanism, various ....
Welcome to the 2019 Symposium
At the Collège d’Études Ostéopathiques in Montreal
From May 31st to June 5th

We are happy to send you the program of the 36th International Symposium on Osteopathy in Montreal. As we do annually, we hope that this will be a beautiful celebration of Osteopathy and that each participant will be able to recharge and learn new solutions to relieve patients.

The program is exciting. Conferences and workshops have been prepared by speakers taking into account the phrase of Andrew Taylor Still:

"Osteopathy is a sacred medicine because it follows the laws of nature"

There will be a lot of activities during the conference day. Fascinating subjects will be presented. It will be a day not to be missed. Our guest speakers will present carefully-prepared workshops, focused on practice, palpation and sharing pearls of knowledge. All workshops will be presented in English and French. New topics will be presented while maintaining respect for Tradition.

To visit the Symposium website or to register, please click on this link:

MOTOR NERVE REFLEX TESTING
A Hands-On Program For Finding Structural Injury

15 Hours of Lecture & Participation CE

Course Objectives:
♦ Learn how to treat cause instead of chasing symptoms
♦ Learn a reproducible SYSTEM for screening and triaging of structural injuries
♦ Learn how to identify and handle dual primary problems
♦ Know when to refer and who to refer to
♦ Learn how being the director of patient care gets you results in treatment
♦ Learn what to do when the patient is still symptomatic.
♦ Understand the difference between Neural Reflex Testing and Kinesiology (Muscle) Testing and when to use one over the other

Course Includes:
♦ 2 Full Days of Lecture & Hands-On Instruction.
♦ Protocol Flowcharts

Directed by International Educator
Steven Olmos, D.D.S.
Founder, TMJ & Sleep Therapy Centre International
Diplomate, American Board of Craniofacial Dental Sleep Medicine
Diplomate, American Board of Dental Sleep Medicine
Diplomate, American Board of Craniofacial Pain
Diplomate, Academy of Integrative Pain Management
FAAOR, FAACP, FICCMO, FADI, FIAO

FEATURING: Mark S. Cantieri, DO, FAAO

Testimonial
"...The whole profession should take this course. It plays such a vital role in helping our patients. I had no idea of the scope of what we can test and then be able to help our patients with targeted success. I felt like now, I really graduated dental school, meaning the dots are all connected! I have been practicing for over 28 years. I did not realize with my past knowledge and now with this new knowledge how much could help so many patients in my practice. It truly creating me a different level dentist! It is very exciting! I could not wait to get back to the dental office and apply what I learned..."
Dr. Cynthia K. Brattesani, San Francisco, CA

INTRODUCTION TO OSTEOPATHIC MANIPULATIVE MEDICINE: Integrating OMM Into Clinical Practice and Teaching

June 13-16, 2019 • The Pyramids • Indianapolis

Course Description
This course will:
• provide basic and refresher knowledge and skills for program directors and core teaching faculty who supervise osteopathic manipulative treatment (OMT) in clinics.
• help MD students and graduates obtain the prerequisites for entering osteopathic-recognized residencies.
• be valuable for clinicians interested in adding OMT to their skill set.

Through a combination of lectures and hands-on workshops, attendees will learn the basics of osteopathic manipulative medicine, which encompasses osteopathic tenets, palpatory diagnosis and OMT.

The curriculum includes lessons on muscle energy technique; thoracic spine technique; articulatory techniques; functional techniques; myofascial release; and high-velocity, low-amplitude thrust.

Course registration includes one copy of Greenman’s Principles of Manual Medicine, 5th edition.

Course Times
Thursday from 1 to 6 p.m.
Friday and Saturday from 8 a.m. to 6 p.m.
Sunday from 8 a.m. to 4 p.m.

Continuing Medical Education
28 credits of AOA Category 1-A CME anticipated.

Meal Information
Morning coffee and tea will be provided Friday through Sunday, as will lunch.

Course Location
The Pyramids, Building Three
3500 DePauw Blvd., Lower Level, Conference Rooms A and B
Indianapolis, IN 46268

Course Director
Lisa Ann DeStefano, DO, has chaired the Department of Osteopathic Manipulative Medicine at the Michigan State University College of Osteopathic Medicine (MSUCOM) in East Lansing since 2004. A protégé of the late Philip E. Greenman, DO, FAAO Dist, Dr. DeStefano edited the fourth and fifth editions of the textbook Greenman’s Principles of Manual Medicine.

A 1993 graduate of MSUCOM, Dr. DeStefano is board certified in osteopathic manipulative medicine and neuromusculoskeletal medicine and in osteopathic family medicine.

The AAO accepts check, Visa, MasterCard and Discover payments in U.S. dollars. The AAO does not accept American Express.

By registering for this course, you agree to abide by the AAO’s code of conduct, photo and video release, and cancellation policy.

Register online at www.academyofosteopathy.org, or submit this registration form and your payment by email to GWatts@academyofosteopathy.org; by mail to the American Academy of Osteopathy, 3500 DePauw Blvd., Suite 1100, Indianapolis, IN 46268-1136; or by fax at (317) 879-0563.
**Course Description**

The goal of this course is to help participants continuously consider the functional reasons for pain and to find function rather than to eliminate pain. This course will help participants acquire a working knowledge of how myofascial release palpatory and treatment techniques can be used alone or in conjunction with other manual medicine methodologies. This course also hopes to help participants in developing the ability to think about specific anatomical areas in three dimensions both statically and dynamically and the ability to assess and treat specific myofascial problems.

**Course Times**

Friday and Saturday from 8 a.m. to 5:30 p.m.
Sunday from 8 a.m. to 12:15 p.m.

**Continuing Medical Education**

20 credits of AOA Category 1-A CME anticipated.

**Meal Information**

Morning coffee and tea will be provided Friday through Sunday.
Lunch will be provided Friday and Saturday.

**Course Location**

The Pyramids, Building Three
3500 DePauw Blvd., Lower Level, Conference Rooms A and B
